General Comment

as a mexican that just moved to the states, I ask from the bottom of my heart to please do not permit the saguaro's project.

I can clearly see how industrialised are the unites States of America and prioritising money than diversity, marine live and contamination aren't part of my values.

The Saguaro LNG project poses unacceptable risks to the environment, marine life, local communities, and the overall well-being of the Gulf of California. A comprehensive and transparent environmental review, along with robust safeguards, is needed before any further consideration of this project.
