General Comment

I believe this project will only cause more harm to both México and the planet. The route planned for the transportation of gas will actively damage the ocean waters as well as the whales who use the area. Furthermore, the continued usage of non-renewable energy (with all it's extraction process) will increase the CO2 emissions, worsening the already bad climate change. I beg for this project to be stopped and to save our planet and its ecosystems for the future generations.
