General Comment

While I support granting the requested extension, I do so specifically because I am fundamentally opposed to the Sahuaro LNG project itself and believe additional time will allow for proper review and ultimately lead to the project's cancellation.

I strongly oppose the Sahuaro LNG project due to its severe environmental consequences that would directly affect my community and region. The facility would contribute to increased air pollution, greenhouse gas emissions, and industrial contamination in an environmentally sensitive area that I care deeply about. The project threatens local ecosystems, marine life, and wildlife habitats that I consider irreplaceable components of Sonora's natural heritage.

This project runs counter to the urgent climate action that I believe our world desperately needs and represents a step backward from renewable energy development that I want to see in our region.
