General Comment

The construction of the natural gas export project compromises the continued existence of a natural area that is very important for the survival of a large number of species. The Sea of Cortez area is one of the richest natural areas in the World in terms of marine flora and fauna diversity, an example of which is the whales that fulfill their reproductive cycles in this area. Industrial development is not above the welfare of ecosystems. The U.S government cannot allow the devastation of an area that is not within its territorial limits.
