Document: DOE-HQ-2025-0240-DRAFT-0275

Comment on FR Doc # 2025-12763

Submitter Information

Name: Marina Del Moral

Address: Cancun,

General Comment

This project poses serious environmental and climate threats. It would send massive gas tankers through the Gulf of California, a UNESCO-recognized marine sanctuary known as the “Aquarium of the World.” This risks harming whales and dolphins through noise pollution and vessel collisions. It’s also expected to emit over 73 million tons of CO₂ annually, more than entire countries like Sweden. The project has sparked opposition from scientists, local communities, and conservation groups who say it violates climate agreements and endangers one of the most biodiverse marine regions on Eart
