General Comment

Our natural resource can be damage with this proyect and also the economy of the towns and people who live there. We recieve whales every year and that is part of our economy, the tourism creat jobs for our comunity and Mexico-Pacific project can eliminate this activity.

Also, there are other species who live in places where the gasoduct trow like "perrito de la pradera" wich is very sensitive and can be displaced. This one is an endangered specie and is necessary for structure, diversity and funtion of grassland ecosystem.
