## General Comment

I am writing to express strong opposition to the Saguaro project due to its potential to cause irreversible harm to our oceans and the diverse life they support. Our marine ecosystems are already under immense pressure from climate change, pollution, and overfishing. The Saguaro project poses a serious risk of further disrupting fragile habitats, endangering marine species, and degrading water quality.

The ocean is not only a source of food and income for millions but also a vital regulator of the Earth's climate. Any project that threatens this balance is a step in the wrong direction. I urge decision-makers to prioritize sustainable development and conservation over short-term industrial gains.

Please halt the Saguaro project and invest instead in clean, ocean-friendly alternatives that respect both nature and future generations.

Sincerely,
