General Comment

California Gulf is one of the richest and productive seas in the world. It is key for the preservation of more than 900 fish species, 170 bird species and 40% of cetaceans.

It is a feeding and reproduction area for whales, dolphins, turtles and sea lions among other animals.

Preserving biodiversity means preserving human wealth and survival.

Please don't approve this project, even if it becomes approved by Mexican government, which would be due to corruption, seeking the benefit of politicians.
