General Comment

This project is a threat to the wildlife, specifically whales and dolphins of the Gulf of California. Scientists have already expressed the concerns and how the project could affect the Gulf. Giving them an extended permission would mean not listening to the proof, not listening to the people (specifically the Mexican people who will be the most affected). We DONT WANT Mexico pacific limited LLC operating ANY kind of "natural gas" in Mexico, even less transporting it through our most cetacean abundant rich waters. As a Mexican citizen and marine biologist I say NO to Mexico pacific limited LLC!!!! We DONT want them here.
