General Comment

Hi i from México,my opinión of this proyecto ITS clear ,ITS a biológico genocide These vessels are dangerous. They invade whale territory, which could cause collisions with them, resulting in their deaths and leading to their obvious extinction. Why, simply, money? In a megaproject that could fail and leave its ruins polluting. Here in Mexico, we are well aware of these large projects that promise a lot at the expense of animal lives, at the expense of the environment. We are in the red with the planet because of these types of projects, which cost us our future and that of future generations. The planet is changing, and not for the better. The poles are shifting. The ozone layer doesn't protect us from what's coming. All because of the greed of the rich who can flee elsewhere while we deal with the consequences. This isn't progress; it's gross genocide.
