General Comment

As a Mexican, it is my duty to condemn every aspect of this "project". It should not be, and we shall not let it be.

It is yet another project that threatens life and entire ecosystems -which are key for wildlife's wellbeing, not only in the region but all around the globe- in exchange for profit to the investors, who seem to be either incompetent, greedy or both.

The people will stand against it, no matter what. This is one of the ways we do so, in hopes that we will be heard before we are forced to take matters into our own hands. We trust the institutions and officials will hear our voices and act accordingly -which is the only correct way of doing your job-, instead of listening only to those who seek profit from investing in inhumane projects such as this, even more so when we're talking about jeopardizing and destabilizing foreign soil and its inhabitants.
