General Comment

Dear DOE Officials,

I'm writing to ask you to ****reject Mexico Pacific Limited's (MPL) request for extra time**** to start exporting liquefied natural gas (LNG). Here's why:

****1. Bad for the Climate****

- LNG leaks ****methane****, a gas that's ****80+ times worse than CO₂**** for global warming (IPCC, 2021).
- The U.S. has promised to ****cut emissions in half by 2030****—more LNG exports make that harder (White House, 2021).

****2. Could Raise Energy Bills****

- Sending more U.S. gas overseas ****drives up prices at home**** (EIA, 2023).
- MPL missed its original deadline, which suggests the project ****isn't even needed**** (IEA, 2024).

****3. Out of Step with Clean Energy Goals****

- The U.S. is investing billions in ****wind, solar, and clean energy**** (Inflation Reduction Act, 2022). Why keep backing fossil fuels?

****What I'm Asking****

- ****Deny MPL's extension request.****
- ****Re-evaluate if this project still makes sense**** given climate goals.
- ****Focus on clean energy**** instead of more gas exports.

Thanks for your time.

Sincerely,

Kari Sullinger
