General Comment

As a human that cares for the preservation of natural places and ecosystems that are vital for the quality of life of the planet we live in.

And knowing the huge impact that whales and the underwater ecosystems have on the climate conditions above surface, I urge this company to cancel this project, as the consequences (proven scientifically) are catastrophic.

We don't want the gas to be transported through mexican waters, and more importantly impact the whale routes, damage the local wildlife and contaminate our oceans. No to the Saguaro project!!!
