## General Comment

The Saguaro project endangers the lives and lifestyles not only of the marine animals and plants of the Gulf of California (which is a wildlife sanctuary like no other in the world) but also of the local people, whose life's are deeply entangled with the fate if this diverse ecosystem.

The project puts economic growth over sustainable and continuous growth and threatens the health of an entire portion of the Mexican republic. The damage it proposes will impact in communities as far as Acapulco and Chiapas and no economic benefit can replace, nor will it ever replace or bring back to life the lives lost, both of the sea creatures and those of the people that will forever be affected by it.

I ask for you to reconsider the project route so that it does not impact this sanctuary, as well as considering taking perhaps a longer route that I know will increase cost, but will be more sustainable and therefore ensure a better future for everyone, not only investors and CEO's.

Finally, I commit you to consider the value of wildlife not only in economic terms, but in cultural, historical and ethical, as well as health terms. No economic "growth" can surpass the environmental growth and wellbeing. Do not condemn thousands of life's for the benefits of more dollars.

Thank you very much.
