General Comment

We don't want that project in our country, it seems like you don't know how much danger it is going to do, we have enough of your projects, we don't want you here.

This project is not only going to affect Mexico, it's going to kill so many innocent animals, and it's going to affect us all for the ecology impact, please dessert it! That would be the better option, we don't need more gases of anything, you can thing in a project more ecological that's the future
