## General Comment

I am writing to oppose the request by Mexico Pacific Limited LLC to extend the deadline for commencement of export operations for the Saguaro Energía LNG project.

There is no compelling justification for a seven-year extension. Granting such a lengthy delay undermines regulatory consistency and opens the door to indefinite postponements without sufficient accountability.

This project poses serious environmental and climate risks, particularly to the delicate ecosystems and communities in Sonora, Mexico. Delaying its start does not reduce these risks—it merely prolongs the threat. Additionally, there has been little transparency or public consultation, especially with Indigenous and local communities.

I urge the Department of Energy to deny the extension or, at the very least, require a detailed explanation and impose a much shorter, strictly limited timeframe.
