General Comment

I know how important is to have these projects for the benefit of the human “progress” but how far we want to go for this so call progress. We also need to think about the other species we share this world with.

We need to protect their life, they cannot speak for themselves. We can not destroy nature just because is an inconvenience for human projects. We need to learn to subsist together.

Please, stop this Saguaro project as it is right now. Find a way to do the same without damaging this area that is so important for the life of the whales, but also is important for us humans to enjoy.
