## General Comment

Mexico Pacific Limited and those related to the Saguaro project. I don't think you understand the catastrophic damage this project represents for the entire world. This horrific project puts in danger the marine life that inhabits our coasts. Don't you know that the California Coast is known as the aquarium of the world? That's where nearly 39% of marine mammals live. That's where most whales stay and reproduce. Whales are not just beautiful, but they are also key to regulating climate change. Here in Mexico, we will NEVER let this happen. We will fight for our world, its seas, and the life that inhabits them.
