General Comment

I am against the project of Mexico Limited, it is a real and serious risk for environment in this region of Sonora. The duct to transport gas is a constant risk of leakage for all the communities and environment where this duct will go through, Texas in the USA, Chihuahua and Sonora states in Mexico. The big ships to transport this fossil fuel to Asia are a threat for the whales and many other ocean species, besides this project directly affects the economic activities of the communities near this project. All these negative impacts have been seen in other similar projects, Canada, USA, Australia, Rusia. The fossil fuel business must be stopped in order to pursue cleaner energy, protect the environment and respect and preserve the culture, rights and health of the communities.
