General Comment

It is a devastating project in every way. Our biodiversity would be severely damaged.

It is contaminating and a threat to ocean life. Whales and other species of ocean mammals, turtles and reptiles would be damaged, killed by the huge natural gas carriers.

Jack Cousto said that the Gulf of California is the world's aquarium.

The local communities would be negatively affected as well. They fish to sustain their families. Tourism focused on whale sighting would end.

Saguaro project is a killer of ocean life. It should never happen.
