General Comment

Nah, this operation has to be cancelled, the well being of thousands of people and a whole ecosystem to be put at risk of being destroyed is horrible and would be ECOCIDE.

Also the boats that you need to transport the gas from the plant to China are known as WHALEKILLERS and you would be sending them through a place well known to be a WHALE NURESERY and is a WHALE NURSERY due to the vast ecosystem that lives there that allows them to grow at their own pace without the risk of other predators, let alone a boat known for their WHALE KILLING capabilities.

And this has been the case for thousands of years, the cultures that lived there documented the sightings of whales as important events, events that are still important, not only because of whales having a known tradition of birthing there, and bc of the great amounts of animals and plants that live there, it is also has an impact on the surrounding states, who depend on a lot of the produces gathered and fished from that place.

With all due respect, if the gasoducts were so important, it would be better if they were built in US soil, now more than ever that the patriotic sentiment is reaching an all time high, is due time that the US starts producing and transporting within their soil to boost moral, jobs, economy and the well being of their own.

MEXICO DOES NOT NEED A GASODUCT THAT WILL ONLY TRAMPLE OVER AND DAMAGE OUR NATURE RESERVES AND THE LIVES OF THOUSANDS OF PEOPLE

Kindly: Like everyone who is aware of this situation
