General Comment

As a Mexican citizen concerned about the well-being and health of my fellow Mexicans and the network of marine and terrestrial ecosystems that sustain the lives of the entire planet, I wish to submit for your consideration:

1. Protection of Mother Earth and Sacred Territories

That Mother Earth be recognized as a living entity with dignity and rights of her own. I categorically reject any project that perpetuates the exploitation of fossil fuels. The Saguaro Energy project represents a direct threat to:

- The ecosystems of the state of Sonora and the Gulf of California region
- The indigenous and peasant communities that have ancestrally guarded these territories
- The natural cycles and ecological balance of the coastal region

2. Climate Crisis and Generational Responsibility

We are experiencing a multidimensional systemic crisis that reflects the limits of an anthropocentric model based on the exploitation of nature. The development of liquefied natural gas infrastructure:

- Directly contributes to global warming and the climate crisis
- Contradicts international commitments to reduce emissions
- Compromises the well-being of present and future generations

3. Rights of Indigenous Peoples

It is everyone's responsibility to honor and defend the rights of the Indigenous nations of Sonora, including the Yaqui, Mayo, Seri, and other peoples, who have been ancestral guardians of these territories. Any project of this magnitude must:

- Guarantee the free, prior, and informed consent of Indigenous peoples
- Respect their territorial and cultural rights
- Recognize their authority as traditional guardians of the region

I request the United States Department of Energy to:

1. DENY the extension requested by Mexico Pacific Limited LLC
2. Conduct a comprehensive environmental assessment that considers the cumulative impacts of the project
3. Ensure meaningful participation of affected communities in the decision-making process

Sincerely,

Yolanda Gutiérrez
