General Comment

STOP SAGUARO PROJECT!!

1) YOU WOULD HARM, AFFECT, IMPACT AND DESTROY MARINE BIODIVERSITY, THAT HAS THE 39% OF THE MARINE MAMALS OF THE WORLD.

2) DANGER TO CETACEANS: The transit of deep-draft LNG vessels (up to 300m) would increase the risk of fatal collisions, and noise pollution could alter their communication, mating and migration patterns.

3) POLLUTION AND CLIMATE CHANGE: Fracking for gas extraction involves massive water use and underground contamination. Furthermore, the combustion of gas and the use of flares would generate significant greenhouse gas emissions.

4) The coastal and indigenous areas of Puerto Libertad and the Baja California Sur Peninsula depend on FISHING AND WHALE WATCHING TOURISM, industries that could be severely affected by changes in the marine ecosystem.

5) FOOD SECURITY THREATENED: More than 60% of Mexico's fishery products come from the Gulf of California region. Any ecological damage could jeopardize the food security and income of millions of people.

6) LACK OF SOCIAL LICENCE!!!! There are multiple LEGAL RESOURCES filed by indigenous communities, NGOs and authorities regarding human rights, environmental rights and prior consultation.

WE DON'T WANT SAGUARO!! DO NO THAT PROJECT, EVER!
