Subject: [EXTERNAL] Safeguarding U.S. Energy Interests: A Critical Look at Saguaro LNG
Date: Tuesday, December 16, 2025 5:19:20 PM

Dear Department of Energy,

We urge you to reconsider the proposed extension for the Saguaro LNG export facility by Mexico Pacific Limited. This decision carries significant implications for U.S. strategic and economic interests that must be thoroughly examined.

****Impact on U.S. Economic and Strategic Interests:****

- ****Economic Concerns:**** Exporting LNG to Asian markets could limit the availability of U.S. natural gas for domestic consumption and industry, potentially harming American businesses.
- ****Investment Competition:**** This project may undermine the development of U.S. Gulf Coast LNG facilities by redirecting resources and investments away from American energy infrastructure.
- ****Energy Security:**** The prioritization of Mexican export terminals could jeopardize U.S. energy independence, signaling a shift in the strategic balance that favors foreign markets, particularly those in Asia.

****Legal Challenges and Environmental Concerns:****

- The project faces ongoing legal challenges in Mexico, including a definitive suspension by a federal court and unresolved lawsuits that question the permit's legitimacy.
- The lack of an environmental review by ASEA and SEMARNAT's statement against authorizing the project further complicates its legal standing.

****Recommendation:****

Denying the extension for the Saguaro LNG project is in the best interest of U.S. energy policy and environmental integrity. Such a decision would preserve our energy resources for domestic development and uphold the legal and environmental standards expected of international projects.

We trust you will consider these factors in your deliberations and act in a manner that prioritizes American interests and sustainability.

Sincerely,

Jose Reyeros Sanchez
