Subject: [EXTERNAL] Urgent Action Needed: Protect American Energy Interests
Date: Tuesday, December 16, 2025 6:45:56 PM

Dear U.S. Department of Energy,

Immediate attention is necessary to prevent the extension of Mexico Pacific Limited's permit for the Saguaro LNG export facility. This project endangers both our economy and national security by diverting significant U.S. energy resources to foreign markets, particularly Asia.

****Impact on American Economy and Security:****

- The U.S. must prioritize our domestic consumers and industries for gas supply, rather than subsidizing international competitors.
- The project poses a direct threat to investments in our own Gulf Coast LNG facilities, essential for our energy infrastructure.
- This initiative siphons off crucial resources from the Permian Basin, impacting our energy independence and strengthening global competitors like China.

****Legal and Environmental Concerns:****

- Authorizations granted in Mexico face significant legal challenges and have been suspended by a Federal court.
- No environmental permits have been provided by the current Mexican administration, raising serious compliance issues.

****Conclusion:****

The extension must be denied. Continuing support for this project risks our strategic energy autonomy and endorses a legally questionable endeavor. Let's prioritize American energy capabilities and protect our strategic interests.

Respectfully,

Amelia Fernández Rodríguez
