**Subject:** [EXTERNAL] Urgent Call: Protect U.S. Interests by Halting Saguaro LNG Extension  
**Date:** Tuesday, December 16, 2025 5:18:41 PM

---

Dear U.S. Department of Energy,

It is imperative that the application for a seven-year extension on the Saguaro LNG export facility be rejected to protect American interests and sustainability.

**\*\*Economic Risks to the U.S.:\*\***

- LNG exports prioritize Asian markets, depriving American consumers and industries of vital resources.
- Competes against U.S. Gulf Coast facilities, undermining domestic infrastructure investment.
- Diverts essential resources from the Permian Basin, shifting wealth abroad.

**\*\*Threats to Energy Security:\*\***

- Overshadowing U.S. energy independence in favor of foreign terminals.
- Reduces domestic supply by committing vital U.S. gas to overseas markets.
- Strengthens strategic competitors, notably China, at America's expense.

**\*\*Legal Concerns in Mexico:\*\***

- Permit modifications granted without necessary environmental assessments.
- Project activities suspended by Mexican courts due to legal challenges.
- Lack of official environmental authorization under the current Mexican administration.

**\*\*Recommendation:\*\***

This extension is unjustifiable under current legal constraints and geopolitical implications. Denying the application will prevent resource misallocation and protect strategic U.S. interests.

The focus should remain on championing U.S. LNG infrastructure development rather than facilitating foreign interests.

Respectfully,

Mikayla Williams
