General Comment

Stop with the opioid restrictions. Uncuff the Doctors who can prescribe them. No one ever got hooked on drugs by following the directions on the bottle. What about our grandparents who took them? Never ever heard of a crisis. Overdose deaths are from the pill mills and you will never stop it. A independent study needs to be performed about how someone died from a pill mill or Dr who prescribe them. People are committing suicide from hurting so bad that is their only choice now. SHAME ON YOU!!!!
