

## **Posting of Off-the-Record Communication**

The attached document was sent to the Department of Energy in reference to this proceeding, Louisiana LNG Infrastructure LLC, Docket No. 16-144-LNG. This document is considered an “off-the-record communication” under 10 CFR 590.102 and 590.108 because (1) the person/entity who either made the communication or knowingly caused the communication to be made is an “interested person;” (2) the communication was directed to a “decisional employee;” and (3) the communication “is relevant to the merits of the proceeding.”

The comment period for this proceeding has closed. This communication is posted here in compliance with regulations. As provided in 10 CFR 590.108(a)(5), a request by a party wishing to rebut this communication, on the record, may be submitted in writing. As specified in this regulation, such requests will be granted “only for good cause.”

Congress of the United States  
House of Representatives  
Washington, DC 20515

December 9, 2025

Assistant Secretary Kyle Haustveit  
Office of Fossil Energy and Carbon Management  
U.S. Department of Energy  
1000 Independence Avenue SW  
Washington, D.C. 20585

Assistant Secretary Haustveit,

I extend my support for Woodside Energy's pending request to extend the commencement deadline of export operations from the Louisiana LNG an additional 44 months under its current non-free trade agreement authorization (FE Docket No. 16-144-LNG).

As you may know, Louisiana LNG is authorized to export 1,415.3 billion cubic feet per year of liquefied natural gas ("LNG") to non-free trade agreement nations for a term extending through December 31, 2050, provided operations must commence by May 2, 2026. The original seven-year timeline following issuance requires an extension, given Woodside Energy's acquisition of Tellurian Inc. and its affiliated assets, including Driftwood LNG LLC (now Louisiana LNG), as well as the need to complete construction. Accordingly, Woodside Energy filed its extension request on May 29, 2025, almost six months ago.

Since announcing final investment decision on April 29, 2025, Woodside Energy has conducted itself with professionalism, advancing the Louisiana LNG project and creating hundreds of construction jobs. The executive leading Louisiana LNG recently reported excellent progress on its construction, and Woodside Energy has my full confidence. Expanding the U.S. LNG industry and enhancing our export capabilities are critical, and Louisiana LNG will contribute to those priorities. The project will further support the United States' role as a global leader in clean, affordable, and abundant energy production. Once operational, the project will supply U.S. LNG globally with offtake agreements already in place for allies in Europe and Asia.

Again, I strongly support Woodside Energy's application for an extension and urge your full and fair consideration of the request. I appreciate your attention to this matter and look forward to working with you to strengthen America's energy infrastructure.

Respectfully,

A handwritten signature in blue ink that reads "Clay Higgins".

Clay Higgins  
Member of Congress
