

Oak Ridge Site Specific Advisory Board Monthly Meeting

Wednesday, February 11, 2026, 6 p.m.

The mission of the Oak Ridge Site Specific Advisory Board (ORSSAB) is to provide informed advice and recommendations concerning site specific issues related to the Department of Energy's (DOE's) Environmental Management (EM) Program at the Oak Ridge Reservation. In order to provide unbiased evaluation and recommendations on the cleanup efforts related to the Oak Ridge site, the Board seeks opportunities for input through collaborative dialogue with the communities surrounding the Oak Ridge Reservation, governmental regulators, and other stakeholders.

Ms. Amy Jones
Chair
Oak Ridge Site Specific Advisory Board
Post Office Box 4067
Oak Ridge, Tennessee 37830

Dear Ms. Jones:

OAK RIDGE OFFICE OF ENVIRONMENTAL MANAGEMENT RESPONSE TO THE OAK RIDGE SITE SPECIFIC ADVISORY BOARD RECOMMENDATION 258 ON THE FISCAL YEAR 2027 BUDGET PRIORITIES

Reference: Letter from Amy Jones to Erik Olds, *Recommendation 258: On the FY 2027 OREM Program Budget Priorities*, dated August 26, 2025

I would like to express my appreciation for the interest the Oak Ridge Site Specific Advisory Board has taken in the Fiscal Year (FY) 2027 budget formulation effort. Thank you for your recommendation. We have submitted your recommendation to the U.S. Department of Energy Environmental Management Federal Advisory Committee Act Designated Federal Officer.

In addition, I am providing a response to each of the Board recommendations below. Please note the language in italics is taken from the referenced letter.

1. *Continue demolition of excess contaminated facilities at Oak Ridge National Laboratory (ORNL) and Y-12 National Security Complex (Y-12).*

Response: The Oak Ridge Office of Environmental Management (OREM) will continue demolition of excess contaminated facilities at ORNL and Y-12 to support the research and national security missions at each site while protecting human health and the environment.

2. *Accelerate infrastructure development to enable future cleanup at ORNL and Y-12.*

- *The primary focus being on the Mercury Treatment Facility construction and operation at the Y-12 National Security Complex.*

Response: OREM is continuing to make progress on construction of the onsite disposal facility. As the Board is aware, the Mercury Treatment Facility has encountered issues which has delayed its completion. In FY 2026, a construction pause is planned to allow the Department to determine the best path forward to meet the requirements while being cognizant of the responsibility to the taxpayer to do work efficiently. Both the Mercury Treatment Facility and onsite disposal facility are constructed utilizing line-item funding appropriated by Congress specifically for these projects.

OAK RIDGE SITE SPECIFIC ADVISORY BOARD RECOMMENDATION 258 ON THE
FISCAL YEAR 2027 BUDGET PRIORITIES**

3. *Continue disposition of U-233 material and other legacy materials.*

- *Nickel, sodium shields, and other materials.*

Response: OREM will continue disposition of U-233 material and other legacy materials. In FY 2025, OREM began disposition of sodium shields to ensure the technology was viable and plans to continue as funds are made available.

4. *Continue processing and disposition of legacy transuranic debris and sludges, including contact-handled and remote-handled wastes.*

Response: OREM will continue planning for and executing disposition and processing legacy transuranic debris and sludges, including contact-handled and remote-handled wastes.

5. *Maintain and operate facilities at ORNL and Y-12.*

Response: OREM will continue to maintain and operate facilities at ORNL and Y-12.

6. *Continue funding support at ORNL's Aquatic Ecology Laboratory for research into mercury and methylmercury pollution and development of new and improved technologies.*

Response: OREM will continue funding support at the ORNL Aquatic Ecology Laboratory for research into mercury and methylmercury pollution and development of new and improved technologies.

7. *Continue funding to enable property transfers, including reindustrialization and site reuse support programs, to further the current nuclear renaissance taking place in the Oak Ridge corridor.*

- *Efforts from TN Governor Bill Lee, Secretary of Energy Chris Wright, and President Donald Trump show the need for funding support for the nuclear industry.*
- *Support research and development activities and fund contracts for academia for the next generation of nuclear workers.*

Response: OREM will continue to support reindustrialization and site reuse support programs to further the current nuclear renaissance taking place in the Oak Ridge corridor. This includes continuing to enable property transfers by continuing good relationships and partnerships with both Federal Facility Agreement counterparts and public non-profit partners who remain focused on community improvement to support the economic development of Oak Ridge through new technologies, jobs, and innovation.

Frequently Asked Questions: Issue Groups

What do issue groups do?

- Issue groups create the original drafts of recommendations that will be considered for sending to DOE. Issue groups discuss ORSSAB topics, usually as articulated in the board's annual work plan, to formulate the board's potential recommendations. Group members select an issue manager from among the group's members, and that issue manager compiles the group members' thoughts into a cohesive draft recommendation.

How often do issue groups meet?

- Issue groups may meet at the discretion of the group members, **however**, group meetings are not required. Generally, group discussions are carried out via email. For effective email discussions, members should ensure all other members of the group are included in the **To:** or **CC:** address lines in email correspondence for the discussion. ORSSAB staff and DOE should also be included in all email correspondence for the discussion.

Can staff help issue groups draft recommendations?

- Actual recommendation directives must come from the members, however staff can help with background information and discussion.

What issue group topics are there?

- ORSSAB issue groups are broken down into monthly presentation topics as listed in the board's annual work plan. For example, OREM Program Outreach (October 2025 topic), Reindustrialization (November 2025 topic), etc.

How do I sign up for an issue group?

- To sign up for an issue group, simply email ORSSAB Staff at orssab@orem.doe.gov to express your interest and you will be added to the email list for that discussion. This may happen at any time, not just at the beginning of the fiscal year.

How many issue groups may I sign up for?

- You may sign up for as many issue groups as you would like. You may also remove yourself from groups. However, everyone is encouraged to join the Budget issue group as it is a required recommendation.

I've signed up for an issue group – Why have I not heard anything further?

- Issue groups are primarily called to action when a board topic may require a recommendation to DOE, and often the board may decide a recommendation is not needed for a topic.

Public Comment to Oak Ridge Site Specific Advisory Board (ORSSAB)

I have commentary on the Public Involvement Plan as well as current issues.

This evening's presentation is about one year late. Actually, it should be presented at a real Annual Planning Retreat as part of a basic regulatory introduction. Updates to the Public Involvement Plan (PIP) are triennial milestones in the Appendix E of the Federal Facility Agreement (FFA). The 2025 update was drafted and being reviewed among the FFA parties around this time last year without input from the public or ORSSAB and little, if any, awareness that the update was in progress.

ORSSAB has not always not been involved in preparation of the PIP. ORSSAB itself found in a recommendation that the PIP, as presented in November 1997, did not comply with the FFA; Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); or Environmental Protection Agency (EPA) guidance in implementing CERCLA. ORSSAB recommended that the document be revised with the assistance of stakeholders and regulators and it was. The Department of Energy (DOE) and its contractors worked with an ad hoc committee of some ORSSAB members and other members of the public in drafting a revised plan. At a minimum ORSSAB should now review the PIP and evaluate itself on performance of what the PIP indicates ORSSAB does. It should consider resuming activities such as assisting in preparation of fact sheets to explain post-Record of Decision changes to CERCLA documents.

The goal of public involvement should be a public not only informed about decisions and progress but providing input as a collaborator during the process. The value added from public involvement beyond that which is legally required cannot be overstated.

DOE public involvement in Oak Ridge is complicated due to there being an Office of Science Consolidated Service Center, an Oak Ridge National Laboratory Site Office, and a Y-12 Field Office, in addition to Oak Ridge Environmental Management (OREM) all conducting environmental, waste management, and emergency preparedness activities. Events like a joint presentation on results in the Oak Ridge Reservation Annual Site Environmental Report or an Emergency Management Forum seem to no longer occur.

Nevertheless, I wish that Nuclear Regulatory Commission public involvement was more like DOE's.

Current issues with aspects that deserve elevated curiosity surrounding their background include:

- Path forward for mercury at Y-12 after pause of the Mercury Treatment Facility
- Path forward to return Rarity Ridge Wastewater Treatment Plant to normal sludge operations
- Emergency Removal Action at the White Oak Creek Sediment Removal Structure
- Time Critical Removal Action at White Wing Scrap Yard
- Impact of CSX railroad track contamination on right-of-way transfer
- Applicability of the Partial Deletion Rule and prescribed public involvement process to decision that half of the Oak Ridge Reservation doesn't require environmental cleanup
