## General Comment

I recommend to not amend the authorization. We need to phase out fossil fuels fast. The best way to do this might be to Natioanlize the industry and liquidate the oil and gas cartels while fully implementing the New Green Deal and fully funding the Inflationary Reduction Act.

It is clear that the chaos, corruption, and wars is entirely linked to the fossil fuel industry.

It is time Americans take back their government from the grips of the fossil fuel industry and live to breathe clean air and drink clean water
