General Comment

RE: Comment for Venture Global CP2 LNG, LLC; Application for Limited Amendment of Authorization to Export Liquefied Natural Gas to Non-Free Trade Agreement Nations (Docket No. 21-131-LNG)

Dear Secretary Wright,

On behalf of all of our youth clients, including our clients in *Lighthiser v. Trump* and *Genesis v. EPA*, and in the interest of America's children and youth, Our Children's Trust provides these comments on the Department of Energy's (DOE) "Venture Global CP2 LNG, LLC; Application for Limited Amendment of Authorization To Export Liquefied Natural Gas to Non-Free Trade Agreement Nation" notice that Venture Global CP2 LNG has filed to expand its pipeline, which facilitates fossil fuel development that is unjustified by law, science, economic prosperity, energy security, or any other reason. Authorization to export additional exports in a volume equivalent to approximately 427 billion cubic feet per year of natural gas will unleash more fossil fuels, worsening the adverse health effects of fossil fuel pollution our clients are currently suffering directly through their inhalation and exposure to the localized pollution and the heat-trapping greenhouse gases from fossil fuels, resulting in further dangerous disruptions of the climate system on which these youths' health and lives depend.

As the Nation's only law firm dedicated to representing children and youth whose constitutional rights are being infringed by government conduct that causes and contributes to climate change, we write to advise you that you are engaged in a decision-making process to implement the President's Executive Orders 14154 and 14156, in violation of U.S. Const. amend. V, XIV, § 1. Your multiplicity of actions pursuant to those Executive Orders, including this effort to support this proposed project, also violate the separation

of powers, by exceeding the authority DOE has been delegated by Congress and by engaging in conduct that has a significant effect on U.S. public health, welfare and the economy, while lacking any scientific integrity as Congress has mandated. DOE has no statutory authority to allow pollution that deprives children and youth of their fundamental rights to life, personal security, family autonomy, bodily integrity, the practice and transmission of cultural and religious traditions, and children's equal protection of the law. U.S. Const. amend. V, XIV, § 1.

Please see the attached comment.

Sincerely,

/s/

Julia Olson
