* For classification purposes, Israel is considered nFTA because the U.S. FTA with Israel does not require national treatment for natural gas, meaning natural gas is not covered as a good or service under the FTA.

* Free Trade Agreement Countries.

Notes and Definitions	
1. Compressed Natural Gas (CNG)	Compressed natural gas (CNG) is natural gas that is compressed to less than 1% of the volume it occupies at standard atmospheric pressure.
2. Free Trade Agreement (FTA)	Countries that have a free trade agreement with the United States requiring national treatment for trade in natural gas.
3. Import & Export by truck & pipeline Prices	The import & export prices by pipeline & truck include the price of natural gas and the transportation cost up to the U.S. border.
4. Imports and Exports by Truck	Natural gas imports & exports by truck included compressed natural gas (CNG) and liquefied natural gas (LNG).
5. Liquefied Natural Gas (LNG)	Liquefied natural gas (LNG) is natural gas that has been liquefied by reducing its temperature to -260 degrees Fahrenheit at atmospheric pressure.
6. LNG Export Prices	LNG export and re-export prices are free on board (FOB) and include all costs of the LNG up to the point of export, including commodity costs and liquefaction fees.
7. LNG Import Prices	LNG import prices are landed and include the price of the LNG, the transportation cost to the U.S. terminal, and the cost of offloading the LNG but do not include the cost of regasification.
8. LNG Re-Exports	LNG re-exports are exports of foreign-sourced LNG that was previously imported into the U.S.
9. Long-Term	Long-term imports or exports are volumes traded under a company's long-term authorization. This type of authorization is for a term of more than two years and is for companies that intend on having long-term gas purchase and/or sales contracts.
10. Publication Date	Data are current as of the publication date. Any revisions to reported data will be published in the next scheduled Natural Gas Imports and Exports Monthly.
11. Reporting Metric	Authorization holders are required to file volume data in thousand cubic feet (Mcf). Therefore, data collected does not necessarily include equivalent amounts of energy, measured in million British thermal units (MMBtu).
12. Short-Term	Short-term imports or exports are those cargos imported or exported under a company's short-term or "blanket" authorization. This type of authorization covers supply contracts with terms up to 2 years, including spot cargos. The authorization is not based on a specific supply contract, but covers all of the importer's short-term supply deals. DOE does not have copies of those contracts and they are not filed with the applications.
13. Split Cargo	Some cargos might be split cargos. Split cargos refer to a single shipment of LNG where portions of the cargo have different transactional characteristics.
14. Spot Cargo	Spot cargos are a one-time transaction for near-term delivery of a specific quantity of LNG at a specific location. Spot cargos could be included in either long-term or short-term authorization types.
15. Volume	Authorization holders are required to file volume data in thousand cubic feet (Mcf). Therefore, data collected does not necessarily include equivalent amounts of energy, measured in million British thermal units (MMBtu).
16. World Region Classification	The world region classification is based on the United Nation standard country or area codes for statistical use (M49). For classification purposes,Turkiye is grouped into Europe.
