Viewshed Analysis with Weighted Visibility

North Plains Connector

Grid United

- Proposed Route
- Visibility Study Area (20-mi Buffer)

Weighted visibility accounts for the change in perceived size of structures in relation to the viewer's distance from the Project. The vertical degrees of an observer's angle of view that a single structure would obstruct is calculated with the formula: $y=2(\arctan(59.436/2x))*(180/3.14)$ where "x" is the distance in meters between the observer and the nearest structure and "y" is the degrees of an observer's view occupied by the structure. This value is multiplied by the number of structures visible at the location to create a value representing total degrees of visual obstruction of the Project.

VISUAL CONTRAST RATING WORKSHEET

Field Observations: August 6, 2024
District/Field Office: Miles City, MT
Resource Area: NA
Activity (program): 500kV DC transmission line

Project Name: North Plains Connector	Location: Township: 05 N Range: 44 E Section: 01	Location Sketch: 
Key Observation Point: MT-02b		
VRM Class: Adjacent to Class III		

Characteristic Landscape Description

	Landform/Water	Vegetation	Structures
Form	bold, jagged, wide, softer rolling hills	complex, irregular, accenting terrain	vertical
Line	hard, jagged, converging, strongly horizontal in badland formations	broken, horizontal, profile of terrain	NA
Color	red, yellow, brown, green contrast visible in erosion features	brown, blue greens, dark green	NA
Texture	coarse, layered, directional in badland features	sparse, scattered	patterned, orderly

Proposed Activity Description (Facility) Distance Zones: FG - Foreground, MG - Middleground, BG - Background

	Landform/Water	Vegetation	Structures
Form	NA	NA	vertical, geometric, prominent
Line	NA	NA	horizontal, thin, ordered
Color	NA	NA	dark brown, gray
Texture	NA	NA	fine, matte, even

Degree of Contrast

		Features											
		Landform/Water Body				Vegetation				Structures			
		Strong	Moderate	Weak	None	Strong	Moderate	Weak	None	Strong	Moderate	Weak	None
Elements	Form				X				X		X		
	Line				X				X		X		
	Color				X				X			X	
	Texture				X				X			X	

Does project design meet visual resource management objectives?
Yes

Additional mitigating measures recommended?

Evaluator Name(s):
North Plains Connector LLC

VISUAL CONTRAST RATING WORKSHEET

Field Observations: August 7, 2024
District/Field Office: Miles City, MT
Resource Area: NA
Activity (program): 500kV DC transmission line

Project Name: North Plains Connector	Location: Township: 06 N Range: 52 E Section: 06	Location Sketch: 
Key Observation Point: MT-03		
VRM Class: Adjacent to Class III		

Characteristic Landscape Description

	Landform/Water	Vegetation	Structures
Form	rugged, rolling, complex	definite, irregular	distinct, contrasting, rectangular
Line	band, digitate edge,	butt edge, horizontal,	perpendicular
Color	contrasting, dull, dark brown, green blue, red, yellow	high contrast green along river	glare, contrasting
Texture	coarse, striped	coarse, dense, clumped	

Proposed Activity Description (Facility) Distance Zones: FG - Foreground, MG - Middleground, BG - Background

	Landform/Water	Vegetation	Structures
Form	NA	No longer continuous	vertical, geometric
Line	NA	hard edge in perpendicular direction	horizontal, thin, ordered
Color	NA		dark brown, gray
Texture	NA		fine, matte, even

Resource Area: NA
Activity (program): 500kV DC transmission line

Project Name: North Plains Connector	Location: Township: 07 N Range: 52 E Section: 18	Location Sketch: 
Key Observation Point: MT-04		
VRM Class: Adjacent to Class II		

Characteristic Landscape Description

	Landform/Water	Vegetation	Structures
Form	rolling hills, flat, wide open	solid, uniform	angular, weak, orderly
Line	jagged horizon	simple, indistinct	linear, vertical
Color	light tan, gold, darker horizon	light tan, gold	dull, weak brown
Texture	continuous	smooth, continuous	fine, scattered

Proposed Activity Description (Facility) Distance Zones: FG - Foreground, MG - Middleground, BG - Background

	Landform/Water	Vegetation	Structures
Form	NA	NA	vertical, geometric
Line	NA	NA	horizontal, thin, ordered
Color	NA	NA	dark brown, gray

VISUAL CONTRAST RATING WORKSHEET

Field Observations: August 5, 2024
District/Field Office: Miles City, MT
Resource Area: NA
Activity (program): 500kV DC transmission line

Project Name: North Plains Connector	Location: Township: 08 N Range: 52 E Section: 28	Location Sketch: 
Key Observation Point: MT-05a		
VRM Class: Class II		

Characteristic Landscape Description

	Landform/Water	Vegetation	Structures
Form	steep, complex, prominent	angular pattern, irregular, jagged	vertical
Line	bold butt edges, complex, horizontal badland pattern, diagonal erosion line	diffuse edge on hills	slim, linear
Color	muted browns, gray, dark green	dark green	dark gray
Texture	random, coarse, dense	dense to medium, follows landscape erosion	ordered, even

Proposed Activity Description (Facility) Distance Zones: FG - Foreground, MG - Middleground, BG - Background

	Landform/Water	Vegetation	Structures
Form	NA	break in continuity with terrain	vertical, geometric
Line	NA	break in continuity with terrain	horizontal, thin, ordered
Color	NA		dark brown, gray
Texture	NA		fine, matte, even
