Wholesale Power Rate Schedule JW-1-M

Availability:

This rate schedule shall be available to public bodies and cooperatives receiving delivery within the state of Florida from the Jim Woodruff Project (hereinafter called the Project).

Applicability:

This rate schedule shall be applicable to capacity and accompanying energy made available by the Government from the Project and sold in wholesale quantities.

Character of Service:

The electric capacity and energy supplied hereunder will be three-phase alternating current at a nominal frequency of 60 cycles per second delivered at the Project point of interconnection.

Monthly Rate:

The monthly rate for capacity and energy made available or delivered under this rate schedule shall be:

Demand Charge:

\$9.02 per kilowatt of monthly contract demand

Energy Charge:

24.72 mills per kilowatt-hour

Contract Demand:

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy Made Available:

The energy made available is the customer's ratable percent of the energy made available from the Project based on the purchaser's allocation of power to the sum of all the allocations of Government power from the Project in each billing month, less losses.

Billing Month:

The billing month for power sold under this schedule shall end at 12:00 midnight Central Prevailing Time on the last day of each calendar month.

Conditions of Service:

The customer shall, at its own expense, provide, arrange for and maintain transmission service necessary to receive allocation of Government power from the Project.
