

Subject: Office of Independent Oversight's Office of Environment, Safety and Health Evaluations Activity Report on its Participation in a Review of Selected Aspects of Nuclear Safety at the Hanford Site Plutonium Finishing Plant, November 29 - December 3, 2010

The U.S. Department of Energy (DOE) Office of Independent Oversight, within the Office of Health, Safety and Security, participated in the Office of Environmental Management Office of Standards and Quality Assurance, EM-23, review of Specific Administrative Controls (SAC) at the Hanford Site. The EM-23 review included selected programs at the Hanford Site that are under the auspices of the DOE Richland Operations Office. During the review, Independent Oversight personnel reviewed a few of the SACs applicable to the Plutonium Finishing Plant. The results of the review are documented in an EM-23 SAC review report.
