

Guidelines for Home Energy Professionals

Request for Information (RFI)

The National Renewable Energy Laboratory (NREL) seeks information from organizations and/or coalitions of organizations that are using or would like to use the three components of the [Guidelines for Home Energy Professionals](#) project.

As part of this RFI, NREL is specifically looking for organizations and/or coalitions pursuing one or more of the following:

1. Adoption of the Guidelines for Home Energy Professionals: [Standard Work Specifications for Single-Family Energy Upgrades](#), possibly as part of an energy reduction program such as a rate payer-funded program or government (state or local) mandate.
2. Implementation of [Home Energy Professional certified workers](#) to conduct the upgrades, either internally or as contractors.
3. Use of an [accredited training program](#) (or trainer) to train workers in preparation of being certified.

Deadline for this RFI is May 31, 2013. For more specific information, please refer to the [Federal Business Opportunities website](#).

The Guidelines for Home Energy Professionals project is a collaboration between with the U.S. Department of Energy and industry to support high-quality home energy upgrade work through standard work specifications, accredited training programs, and voluntary national worker certifications.
