U.S. DEPARTMENT OF ENERGY
OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY
NEPA DETERMINATION

RECIPIENT: Carnegie Mellon University

PROJECT TITLE: An Extensible Sensing and Control Platform for Building Energy Management

Funding Opportunity Announcement Number: DE-FOA-0000822
Procurement Instrument Number: DE-EE0006353
NEPA Control Number: GFO-0006353-001
CID Number: GO6353

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination
Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

B3.6 Small-scale research and development, laboratory operations, and pilot projects
Siting, construction, modification, operation, and decommissioning of facilities for small-scale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

Rationale for determination:
The U.S. Department of Energy (DOE) is proposing to provide federal funding to Carnegie Mellon University to develop an open-source Building Automation System (BAS) for optimizing electricity usage in small and medium-sized buildings.

This project consists of three phases. Phase 1 includes the development of the initial BAS software platform and hardware (thermostat, lighting controller, and general purpose controller) that would be tested and deployed in later Phases. Phase 2 includes testing of the complete BAS software platform with the selected three hardware devices in Scafe Hall at Carnegie Mellon University in preparation for deployment in up to three existing commercial buildings as part of Phase 3 activities.

This NEPA Determination is for Phase 1 and 2 only. There is a Go/No-Go decision point between Phases 2 and 3. Based upon review of the results of Phase 2 activities, DOE may or may not decide to continue funding the project into Phase 3. If the project is selected to move forward with Phase 3 activities another NEPA review will be required before those activities begin.

Based on review of the project information, DOE has determined Phase 1 and Phase 2 activities would not have a significant individual or cumulative impact to human health and/or environment. DOE has determined the proposed project is consistent with actions contained in DOE categorical exclusions A9 “Information gathering, analysis, and dissemination,” and B3.6 “Small-scale research and development, laboratory operations, and pilot projects,” and is categorically excluded from further NEPA review.

NEPA PROVISION

DOE has made a conditional NEPA determination for this award, and funding for certain tasks under this award is contingent upon the final NEPA determination.

Insert the following language in the award:

You are restricted from taking any action using federal funds, which would have an adverse affect on the environment or limit the choice of reasonable alternatives prior to DOE/NNSA providing either a NEPA clearance or a final NEPA decision regarding the project.

https://www.eere-pmc.energy.gov/GONEPA/ND_Form.aspx?key=18007

9/18/2013
Prohibited actions include:
Phase 3
This restriction does not preclude you from:
Phase 1
Phase 2
If you move forward with activities that are not authorized for federal funding by the DOE Contracting Officer in advance of the final NEPA decision, you are doing so at risk of not receiving federal funding and such costs may not be recognized as allowable cost share.

Note to Specialist:

This NEPA Determination requires a tailored NEPA provision.

Casey Strickland 9/17/2013

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.

FIELD OFFICE MANAGER DETERMINATION

☐ Field Office Manager review required

NCO REQUESTS THE FIELD OFFICE MANAGER REVIEW FOR THE FOLLOWING REASON:

☐ Proposed action fits within a categorical exclusion but involves a high profile or controversial issue that warrants Field Office Manager's attention.
☐ Proposed action falls within an EA or EIS category and therefore requires Field Office Manager's review and determination.

BASED ON MY REVIEW I CONCUR WITH THE DETERMINATION OF THE NCO:

Field Office Manager's Signature: ____________________________ Date: ____________________
