Comprehensive Assessment of the Emissions from the Use of Biodiesel in California

Poster Session Part 3 – Poster P-5

*Thomas D. Durbin*, Kent C. Johnson, and J. Wayne Miller
College of Engineering-Center for Environmental Research and Technology (CE-CERT), University of California, Riverside

Bob Okamoto, Gary Yee, Keshav Sahay, William H. Robertson, Don Chernich, Paul Rieger, Oliver Chang, Mark Fuentes, Dean Boudoff, Aubrey Sideco, and Alberto Ayala
California Air Resources Board (CARB)

Norm Y. Kado, Reiko Kobayashi, and Fumio Matsumura
Department of Environmental Toxicology, University of California, Davis

*Christoph F.A. Vogal* and *Patrick S. Wong*
Center for Health and the Environment, University of California, Davis

*Thomas M. Cahill*
Department of Integrated Natural Sciences, Arizona State University
Overview – Poster P-5

• Calif. – looking at increased biofuel use – low carbon fuel standard
• Still knowledge gaps in NO$_x$ impacts
• Extensive test program
  – Engine and chassis testing/ UCR & CARB
  – 2 engines, 3 vehicles, 2 off-road engines
  – soy & animal biodiesel + renewable diesel
  – B0, B5, B20, B50, B100
• Cycles with low, medium, and high load
