Objective: Develop an exhaust heater suitable for in exhaust use for

- Improving catalyst function during cold cycles
- Ensuring reliable filter regeneration when used with HC dosing

Nik Birkby; Steven Beesley; Mark Ramsbottom & Navin Khadiya

EMCON Technologies
Benefits

- Eliminates the need for engine based thermal management improving fuel economy
- Improves engine durability particularly when using Bio Diesel
- Rapid heating of DOC (≈15 seconds)
- Helps reduce PGM and potentially the size of the aftertreatment system
- No combustion air is required
- Proven components
- Small package claim
- Cost effective
