

Reduction of Emission Variance by Intelligent Air Path Control

Harsha Nanjundaswamy, Dean Tomazic
FEV Inc., Michigan, USA

Thorsten Schnorbus, Jose Geiger, Thomas Körfer
FEV GmbH, Aachen, Germany

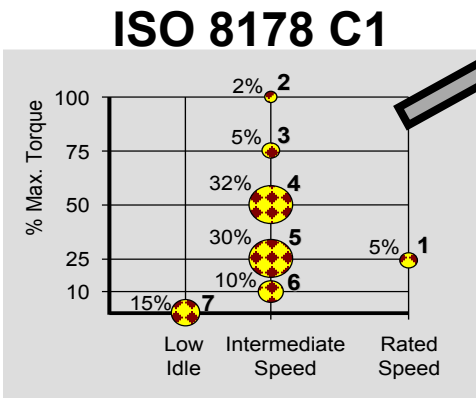

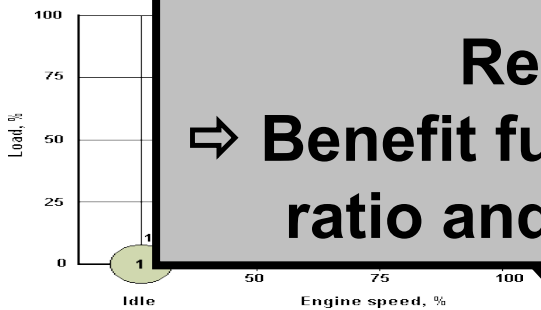

Joschka Schaub
VKA RWTH, Aachen, Germany

Introduction

FEV control concept motivation: Fuel consumption

Target:
 Relax NOx engineering target
 ⇒ Benefit fuel consumption from higher air fuel ratio and lesser DPF regeneration events

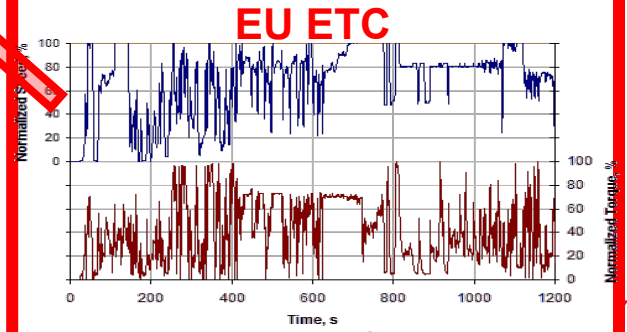

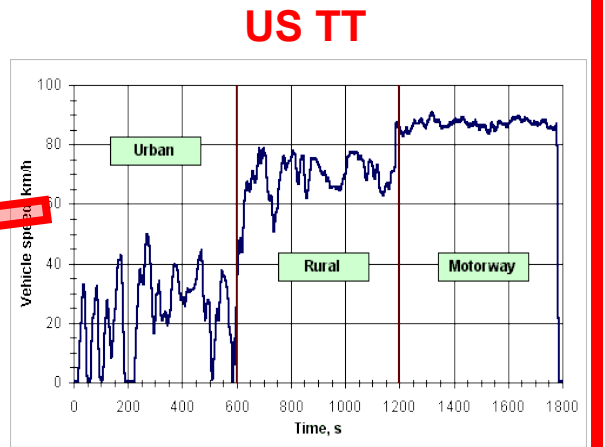

ISO 8178 C2

Engineering Target

- ◆ Quasi Steady State Emission
- Transient w/ Air Mass Control

NRTC

Target based intelligent air path control

FEV HECS control strategies: NOx-based air path control
