

Day 1 Report—Breakout Group: Biochem Group

Priority Barriers:

- Lack of industrial robustness of microorganisms, enzymes, and process which increase cost of goods and decrease CAPX efficiency.
- Lack of critical realistic evaluation of technologies/processes which lower investor confidence.
- Lack of carbon and energy efficiency which effects cost and sustainability.
- Silos and Silo thinking within companies, organizations, and stakeholders which hinder collaboration and limits resources.

Day 1 Report—Breakout Group: Biochem Group

Key Reflections:

- Agreement on the importance of microorganism enzyme and process robustness.
- The shell guy had a good idea.
