

LOUISIANA OFFSHORE OIL PORT

A STRATEGIC CRUDE OIL HUB

Linking energy producers with America's refineries

Linking World Energy Producers

Marine Terminal

Safely offloaded 9,222 ships totaling:

9.8 billion barrels since 1981

Offshore Production

Mars and Endymion production streams:

Over 2 billion barrels

HoHo Pipeline

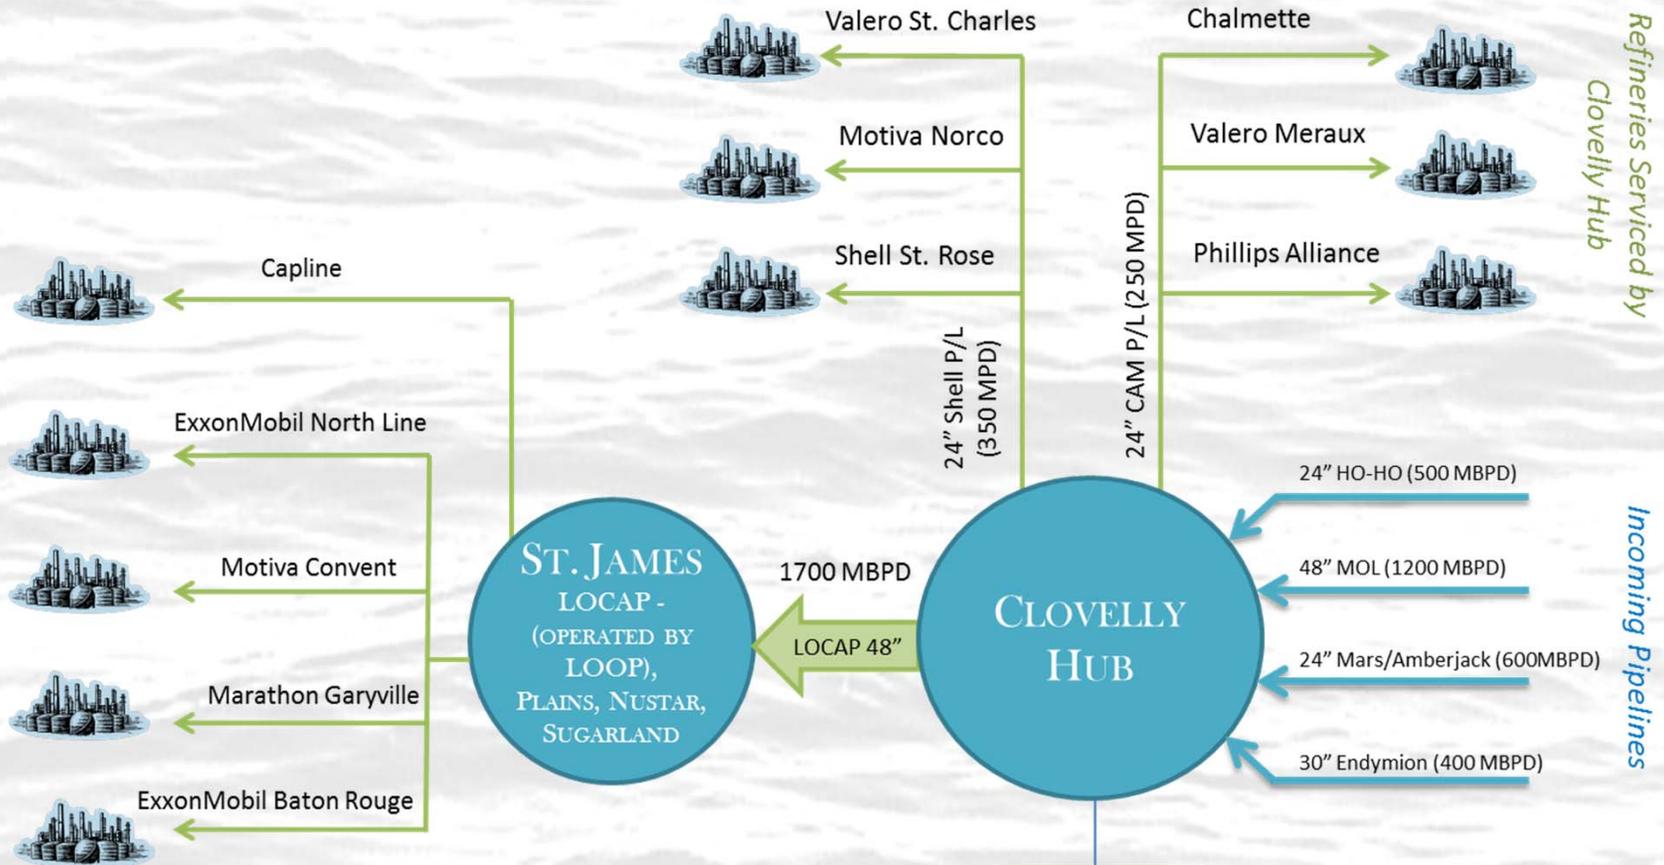

In the early stages of reversal:

Accounts for approximately 10% of the oil handled at LOOP

To America's Refineries

2.4 MMBPD of Refining Capacity

8 Caverns
60 MM bbls

15 Tanks
9 MM bbls

70 Million Barrels of Storage

LOOP has 15 above ground storage tanks, each with a capacity of 600,000 barrels, for a total capacity of 9,000,000 barrels in Clovelly, LA.

There are 8 salt caverns with a combined storage capacity of over 60 million barrels

*A critical link in the nation's
energy chain*

LOOP remains a critical piece of the US crude oil infrastructure, able to adapt to market changes and provide flow assurance to its global clients.
