July 1, 2014

MEMORANDUM FOR THE ADMINISTRATOR, SOUTHWESTERN POWER
ADMINISTRATION

FROM: *Daniel M. Weeber*
Daniel M. Weeber
Assistant Inspector General
for Audits and Administration
Office of Inspector General

SUBJECT: INFORMATION: Audit Report on "Southwestern Federal Power
System's Fiscal Year 2013 Financial Statement Audit"

The attached report presents the results of the independent certified public accountants' audit of the Southwestern Federal Power System's (SWFPS) combined balance sheets, as of September 30, 2013 and 2012, and the related combined statements of changes in capitalization, revenues and expenses, and cash flows for the years then ended.

To fulfill the Office of Inspector General's (OIG) audit responsibilities, we contracted with the independent public accounting firm of KPMG, LLP (KPMG) to conduct the audit, subject to our review. KPMG is responsible for expressing an opinion on SWFPS's financial statements and reporting on applicable internal controls and compliance with laws and regulations. The OIG monitored audit progress and reviewed the audit report and related documentation. This review disclosed no instances where KPMG did not comply, in all material respects, with generally accepted Government auditing standards. The OIG did not express an independent opinion on SWFPS's financial statements.

KPMG concluded that the combined financial statements present fairly, in all material respects, the respective financial position of SWFPS as of September 30, 2013 and 2012, and the results of its operations and its cash flow for the years then ended, in conformity with United States generally accepted accounting principles.

As part of this review, the auditors also considered SWFPS's internal controls over financial reporting and tested for compliance with certain provisions of laws, regulations, contracts and grant agreements that could have a direct and material effect on the determination of financial statement amounts. The audit identified the following significant deficiencies in internal control over financial reporting:

- One internal control deficiency over Accounting for Utility Plant was identified where depreciation for additions and betterments to existing plant in service was not recorded in accordance with accounting policies.

- One internal control deficiency over Accrued Expenses was identified where expenses for goods and services received were not properly accrued.

U.S. Army Corps of Engineers management agreed with the findings and recommendations and agreed to take the necessary corrective actions.

The audit disclosed no instances of noncompliance or other matters that are required to be reported under Government auditing standards. We appreciated the cooperation of Department of Energy elements during the review.

Independent Auditors' Report

Administrator, Southwestern Power Administration and the
Inspector General, U. S. Department of Energy:

Report on the Financial Statements

We have audited the accompanying combined financial statements of the Southwestern Federal Power System (SWFPS), which comprise the combined balance sheets as of September 30, 2013 and 2012, and the related combined statements of changes in capitalization, revenues and expenses, and cash flows for the years then ended, and the related notes to the combined financial statements. As described in note 1(a), the combined financial statements include all of the hydroelectric generating and power operations of the U.S. Army Corps of Engineers (the generating agency), and the transmission and disposition of the related power by the Southwestern Power Administration (Southwestern), a component of the U.S. Department of Energy.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these combined financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of combined financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these combined financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the combined financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the combined financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the combined financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the combined financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the combined financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

***Opinion***

In our opinion, the combined financial statements referred to above present fairly, in all material respects, the respective financial position of the Southwestern Federal Power System as of September 30, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Other Matters***Supplementary and Other Information***

Our audits were conducted for the purpose of forming an opinion on the SWFPS's basic combined financial statements taken as a whole. The supplementary information in schedules 1 through 4 is presented for purposes of additional analysis and is not a required part of the basic combined financial statements.

The supplementary information in schedules 1 through 4 is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic combined financial statements. Such information has been subjected to the auditing procedures applied in the audits of the basic combined financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic combined financial statements or to the basic combined financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information in schedules 1 through 4 is fairly stated, in all material respects, in relation to the basic combined financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our reports dated June 18, 2014 on our consideration of SWFPS's internal control over financial reporting and our report dated June 18, 2014 on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of those reports is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SWFPS's internal control over financial reporting and compliance.

Independent Auditors' Report on Internal Control over Financial Reporting Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Administrator, Southwestern Power Administration and the
 Inspector General, U.S. Department of Energy:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the combined financial statements of the Southwestern Federal Power System (SWFPS), which comprise the combined balance sheets as of September 30, 2013 and 2012, and the related combined statements of changes in capitalization, revenues and expenses, and cash flows for the years then ended, and the related notes to the combined financial statements, and have issued our report thereon dated June 18, 2014. The combined financial statements include all of the hydroelectric generating and power operations of the U.S. Army Corps of Engineers (the generating agency), and the transmission and disposition of the related power by the Southwestern Power Administration (Southwestern), a component of the U.S. Department of Energy.

Internal Control over Financial Reporting

In planning and performing our audit of the combined financial statements as of and for the year ended September 30, 2013, we considered SWFPS's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the combined financial statements, but not for the purpose of expressing an opinion on the effectiveness of SWFPS's internal control. Accordingly, we do not express an opinion on the effectiveness of SWFPS's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the combined financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified.. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified. We did identify certain deficiencies in internal control, described below, that we consider to be significant deficiencies. Exhibit I presents the status of prior year significant deficiencies.

A. Significant Deficiency in Internal Control over Utility Plant

The combined financial statements include the hydroelectric power generating functions of the generating agency, for which Southwestern markets and transmits power. Southwestern maintains the responsibility of preparing the combined financial statements and related footnotes in accordance with the U.S. Department of Energy Order RA 6120.2, dated September 20, 1979.

SWFPS owns and operates over 1,400 miles of high voltage transmission lines, substations, and communication sites, with more than \$795.9 million of net plant in service and more than \$212.6 million of construction work in progress (CWIP). Southwestern and the generating agency are responsible for properly accounting for utility plant, including assigning appropriate useful lives and classifying acquisitions into appropriate asset categories.

During our test work over utility plant, we identified the following conditions:

- Certain additions to Vicksburg's CWIP projects, although relating to the power function, were initially recorded to the recreation purpose code and subsequently reclassified. While the approximate \$373,000 in transactions identified only represents a small portion of the combined CWIP balance, insufficient controls over the classification of individual CWIP expenditures may result in a misstatement that, when aggregated, is more than inconsequential to the combined financial statements.
- Certain balances within Vicksburg's CWIP projects were substantially complete but were not appropriately transferred to plant in service or depreciated. We identified \$1.1 million in balances that should have been reclassified; however, we concluded that there was not a significant impact on recorded depreciation expense for the period ended September 30, 2013.
- Interest during construction (IDC) on CWIP balances, specifically those within U.S. Treasury symbol ending in 8862, was not properly recorded throughout the various districts of the generating agency. Specifically, the Vicksburg, Ft. Worth, and Tulsa districts did not capitalize interest on the related outstanding CWIP balances, resulting in an understatement of IDC as well as an inconsistency between those districts that did record IDC and those that did not. Management subsequently calculated IDC and recorded an adjustment to the combined financial statements.

Recommendations

1. Evaluate existing generating agency policies and procedures over the review and approval of CWIP expenditures to ensure they are designed at the appropriate level of precision to properly code the purpose of the transaction.
2. Evaluate existing generating agency policies and procedures over the review of outstanding CWIP balances to ensure they are designed at the appropriate level of precision to identify, transfer to plant in service, and depreciate substantially completed projects.

3. Evaluate existing generating agency policies and procedures over the recording of IDC to ensure (a) consistent treatment across all relevant generating agency districts and (b) recorded on all relevant CWIP balances.

Management's Response

Generating agency management concurs with the findings and will take corrective action.

B. Significant Deficiency in Internal Control over Accrued Expenses

During our test work over the combined financial statements, we identified instances where SWFPS did not properly accrue for goods and services received prior to September 30, 2013. Specifically, we identified the following condition:

- We identified \$1.2 million of goods and services received prior to September 30, 2013 at the Little Rock and Tulsa districts that should have been accrued but were not. Of the \$1.2 million, approximately \$1.1 million related to CWIP. While the approximate \$1.1 million in transactions identified only represents a small portion of the combined CWIP balance, insufficient controls over ensuring accruals are complete may result in a misstatement that, when aggregated, is more than inconsequential to the combined financial statements.

Recommendations

1. Evaluate existing generating agency policies and procedures over preparing accruals at period end to ensure they are designed at the appropriate level of precision to identify all appropriate accruals.
2. Consider implementing procedures to review disbursements made subsequent to year-end to ensure all appropriate accruals have been recorded.

Management's Response

Generating agency management concurs with the findings and will take corrective action.

SWFPS'S Responses to Findings

SWFPS's responses to the significant deficiencies identified in our audit are described previously. SWFPS's responses were not subjected to the auditing procedures applied in the audit of the combined financial statements and, accordingly, we express no opinion on the responses.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and the result of that testing, and not to provide an opinion on the effectiveness of SWFPS's internal control. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SWFPS's internal control. Accordingly, this communication is not suitable for any other purpose.

Independent Auditors' Report on Compliance and Other Matters Based on an Audit of Combined Financial Statements Performed in Accordance With *Government Auditing Standards*

Administrator, Southwestern Power Administration and the
Inspector General, U.S. Department of Energy:

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the combined financial statements of the Southwestern Federal Power System (SWFPS), which comprise the combined balance sheets as of September 30, 2013 and 2012, and the related combined statements of changes in capitalization, revenues and expenses, and cash flows for the years then ended, and the related notes to the combined financial statements, and have issued our report thereon dated June 18, 2014. The combined financial statements include all of the hydroelectric generating and power operations of the U.S. Army Corps of Engineers (the generating agency), and the transmission and disposition of the related power by the Southwestern Power Administration (Southwestern), a component of the U.S. Department of Energy.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether SWFPS's combined financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of combined financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests of compliance disclosed no instances of noncompliance or other matters that are required to be reported herein under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of compliance and the result of that testing, and not to provide an opinion on SWFPS's compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering SWFPS's compliance. Accordingly, this communication is not suitable for any other purpose.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(1) Summary of Significant Accounting Policies**(a) General Information and Basis of Preparation of Financial Statements**

The Southwestern Federal Power System (SWFPS) financial statements combine all of the activities associated with the production, transmission, and disposition of all Federal power marketed under Section 5 of the Flood Control Act of 1944 (the Flood Control Act) by the Southwestern Power Administration (Southwestern), an agency of the U.S. Department of Energy (DOE). The accompanying combined financial statements include the accounts of Southwestern and the related hydroelectric generating facilities and power operations of the U.S. Army Corps of Engineers (Corps), an agency of the U.S. Department of Defense (DOD). Southwestern and the Corps are separately managed and financed and each maintains their own accounting records. For purposes of financial and operational reporting, the facilities and related operations of Southwestern and the Corps (power purpose) are combined as SWFPS.

The Corps has constructed and operates hydroelectric generating facilities in the states of Arkansas, Missouri, Oklahoma, and Texas. Operating expenses and net assets of multipurpose Corps projects are allocated to power and nonpower purposes (primarily recreation and flood control). Only the portion of such project costs and net assets allocated to power are included in the combined financial statements. Southwestern, as designated by the Secretary of Energy, transmits and markets power generated from these hydroelectric generating facilities.

SWFPS is subject to the accounting regulations of the Federal Energy Regulatory Commission (FERC). Accounts are maintained in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) as established by the Financial Accounting Standards Board (FASB), the uniform system of accounts prescribed for electric utilities by the FERC, the accounting practices and standards established by the DOE and DOD, and the requirements of specific legislation and executive directives issued by government agencies. All material intra-entity balances and transactions have been eliminated. SWFPS's combined financial statements follow the accounting and reporting guidance contained in FASB Accounting Standards Codification (ASC) Topic 980, *Regulated Operations*. Allocation of costs and revenues to accounting periods for rate-making and regulatory purposes may differ from bases generally applied by nonregulated companies. Such allocations to meet regulatory accounting requirements are considered to be U.S. GAAP for regulated utilities, provided that there is a demonstrable ability to recover any deferred costs in future rates and such costs or revenues are accounted for as regulatory assets or liabilities.

(b) Confirmation and Approval of New Rates

SWFPS is not a public utility within the jurisdiction of the FERC under the Federal Power Act. Under a Delegation Order issued by the Secretary of Energy, the Administrator of Southwestern has the authority to develop power and transmission rates for the SWFPS. Such rates are approved on an interim basis by the Deputy Secretary of Energy. The FERC has the exclusive authority to confirm, approve, and place into effect on a final basis, to remand, or to disapprove, rates developed by the Administrator.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

The FERC's review is limited to (1) whether the rates are the lowest possible consistent with sound business principles, (2) whether the revenue levels generated are sufficient to recover the costs of producing and transmitting electric energy, including repayment within the period permitted by law, and (3) the assumptions and projections used in developing the rates component. The FERC shall reject decisions of the Administrator only if it finds them to be arbitrary, capricious, or in violation of the law.

The rates in effect as of September 30, 2013 are summarized as follows:

The Integrated System rate schedules were placed into effect January 1, 2012 and were confirmed and approved by the FERC on March 5, 2012. These rate schedules incorporated a 5.4% revenue increase and remain in effect through September 30, 2015, or until superseded by new rate schedules.

The Robert D. Willis project rate was placed into effect October 1, 2012 and was confirmed and approved by the FERC on April 29, 2013. This rate increase incorporated a 15.4% revenue increase for the period October 1, 2012 through September 30, 2016.

The Sam Rayburn Dam project rate required no rate increase during fiscal year 2013. The approved Sam Rayburn Dam project rate in effect from January 1, 2009 through September 30, 2012 was extended for a one-year period through September 30, 2013. This extension was approved by the Deputy Secretary on November 7, 2012.

(c) ***Utility Plant and Depreciation (Note 2)***

Utility plant includes items such as dams, spillways, generators, turbines, substations and related components (generating facilities), and transmission lines and related components. Utility plant is stated at original cost, net of contributions by external entities. Property transferred from other government agencies is transferred at net book value. Cost includes direct labor and material, payments to contractors, indirect charges for engineering, supervision and similar overhead items, and an allowance for funds used during construction. The costs of additions and betterments are capitalized. Repairs and minor replacements are charged to operation and maintenance expense. Generally, the net cost of utility plant retired, together with removal costs less salvage, is charged to depreciation when the property is removed from service.

The policy of Southwestern and the Corps is to move capitalized costs into completed utility plant at the time a project or feature of a project is deemed to be substantially complete. A project is substantially complete when it is providing benefits and services for the intended purpose and is generating project purpose revenue, where applicable.

Depreciation on utility plant is computed on a straight-line basis over the estimated service lives of the various classes of property. Service lives currently range from 5 to 100 years for transmission plant and generating facility components.

(d) ***Cash and Funds Held in Escrow***

Cash represents the unexpended balance of funds authorized by Congress, customer advances, and spectrum relocation funds, held at the U.S. Department of the Treasury (Treasury). Cash received

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

from the sale of power is generally deposited directly with the Treasury and is reflected as “Payments to U.S. Treasury” in the accompanying combined financial statements. Cash held for customer advances is restricted for the purposes agreed to between Southwestern and the customer.

Funds held in escrow represent the unexpended balance of funds held in a bank trust account under alternative financing agreements (note 4b) with certain customers and are restricted specifically to fund operation, maintenance, rehabilitation, and modernization activities at hydroelectric generating facilities of the Corps in SWFPS’s marketing region. Under the agreements, funds deposited to the escrow account by customers are credited by Southwestern against accounts receivable for power and energy sold to the customer. The escrowed funds are transferred to the Corps, as needed, to meet contractual obligations as outlined in the agreements. Unused funds held in escrow, if any, will be returned to Southwestern and then to the Treasury upon termination of the agreements.

(e) Congressional Appropriations

Southwestern and the Corps receive congressional appropriations through DOE and DOD, respectively, to finance their operations. Certain of Southwestern’s appropriations are offset by the use of receipts collected from the sale of Federal hydroelectric power, resulting in a net zero appropriation. The Corps also receives appropriations to finance construction of its hydroelectric projects. In accordance with the Flood Control Act, Southwestern is responsible for repayment to the Federal government, with interest, of its appropriations, and the portion of congressional appropriations allocated to the Corps for construction and operations of the power projects.

Congressional appropriations received by the Corps are authorized and allocated to individual projects. It is the intent of the Corps’ project management to distribute congressional appropriations in amounts approximating estimated current year expenses and to adjust the distribution as necessary within the limits of the transfer authority residing at the district level. Project costs that are not specific to a project purpose are distributed between power and nonpower purposes based on project cost allocation.

(f) Operating Revenues

Operating revenues are recorded on the basis of service rendered. Rates are established under requirements of the Flood Control Act, related legislation and executive departmental directives, and are to provide sufficient revenues to meet all required repayment of system costs, including operation and maintenance expenses less depreciation, interest, and payment to the U.S. Treasury for the Payable to U.S. Treasury in utility plant. Rates are intended to provide for recovery of the Payable to U.S. Treasury in transmission and generating facilities not to exceed 50 years from the date placed in service, while operation and maintenance costs and interest on Payable to U.S. Treasury are intended to be recovered annually.

As set forth in “Utility Plant and Depreciation” above, assets are being depreciated for financial reporting purposes using the straight-line method over their estimated service lives, which currently range from 5 to 100 years for transmission and generating facility components. Accordingly, annual depreciation charges are not matched with the recovery of the related capital costs and will, in the case of generating facilities, continue beyond the period within which such costs will have been recovered through rates.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

While energy and transmission rates are established to recover the costs of operating the power projects, rates are also required to be at the lowest possible level, consistent with sound business principles. Over the life of the power system, accumulated net revenues represent differences between the timing of the recognition of expenses and related revenues, resulting primarily from the difference between the recognition of depreciation and the related recovery of the U.S. Treasury's investment in utility plant. SWFPS is a Federal entity, thus at any given time, the accumulated net revenues, to the extent available, are committed to the repayment of the Payable to U.S. Treasury.

The practices followed by Southwestern and the Corps are in conformity with the accounting practices and standards established by DOE and DOD and the requirements of specific legislation and executive directives issued by government agencies. Based upon guidelines established in DOE Order RA 6120.2, revenues distributed to the Corps cover annual operating expenses, including interest, with the remainder applied to the unpaid generation investment.

In addition to providing electric power and energy, Southwestern provides scheduling, billing, and other ancillary services. Southwestern may provide multiple services to any one customer and accounts for these arrangements in accordance with the provisions of ASC Subtopic 605-25, *Revenue Recognition – Multiple-Element Arrangements*. Services qualify as separate units of accounting with distinguishable rates, terms, and delivery schedules. Services are provided to meet customer load requirements and revenues are recognized when services are provided.

(g) ***Regulatory Assets and Liabilities (Note 3)***

Regulatory assets and liabilities result from rate actions of Southwestern's Administrator and other regulatory agencies. These assets and liabilities arise from specific costs and revenues that would have been included in the determination of net revenue in one period, but are deferred until a different period for purposes of developing rates to charge for services, per the requirements of ASC Topic 980. SWFPS defers transactions as regulatory assets and liabilities so that costs will be recovered during the periods when the costs are scheduled to be paid. This ensures the matching of revenues and expenses. The assets and liabilities below are regulatory in nature:

Deferred Workers' Compensation

Workers' compensation consists of two elements: actuarial liability associated with workers' compensation cases incurred for which additional claims may still be made in the future (future claims) and a liability for expenses associated with actual claims incurred and paid by the Department of Labor (DOL), the program administrator, whom SWFPS must reimburse. DOL, DOE, and DOD determined Southwestern and the Corps' actuarial liability associated with workers' compensation cases. The actuarial liability for future claims was determined using historical benefit payment patterns and the Treasury discount rates.

The recovery of these future claims will be deferred for purposes of the rate-making process until such time as the future claims are actually submitted and paid by the DOL. Therefore, the recognition of the expenses associated with this actuarially determined liability has been recorded as deferred workers' compensation in the combined balance sheets in accordance with ASC Topic 980 to reflect the effects of the rate-making process. SWFPS does not earn a rate of return on the deferred workers' compensation regulatory asset.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

Denison Hydropower Water Storage Reallocation

Section 838 of P.L. 99-662 (Section 838) authorized the Corps to reallocate hydropower storage to water supply storage at Lake Texoma, in increments as needed, up to 150,000 acre-feet for users in the State of Texas and up to 150,000 acre-feet for users in the State of Oklahoma. Section 838 directed that the Corps would provide credits to Southwestern equal to the replacement cost of the hydropower lost as a result of the reallocations, and Southwestern would reimburse the preference customers (Denison allottees) for an amount equal to the customers' replacement cost of the hydropower lost as a result of the reallocations.

In fiscal year 2010, the Corps executed water supply contracts for the 150,000 acre-feet of storage authorized for customers in the State of Texas by Section 838. According to a June 2010 agreement between Southwestern and the Corps, the Corps agreed to deposit all cost of storage payments for storage reallocated under Section 838 into the U.S. Treasury and to provide credits in the same amount to the hydropower income account. The total amount received of \$58,786,011 was deferred by Southwestern for the provision of the reimbursement to the Denison allottees and Southwestern for future hydropower storage revenues foregone. The reallocation deferral accrued interest at 2.75% and 4.00% of the outstanding balance for the years ended September 30, 2013 and 2012, respectively, based on law, administrative order, or administrative policy. Interest earned on the outstanding balance totaled \$1,642,289 and \$2,357,342 for the years ended September 30, 2013 and 2012, respectively.

A September 2010 agreement between Southwestern and the Denison allottees provided the initial hydropower replacement cost as determined by Southwestern and the methodology for providing the reimbursement to the Denison allottees as authorized under Section 838. Beginning with the invoice for the October 2010 service month, reimbursement pursuant to Section 838 began as a credit on the Denison allottees' monthly invoices.

Purchased Power and Banking Exchange Deferral

SWFPS utilizes a separate rate component (purchased power adder) to recover the estimated cost of purchased power based upon the average purchased power costs expected to occur in the future. If the actual expenses of purchased power exceed the revenue generated from this adder, the cost is deferred for future recovery through the rates. Likewise, if the expense is less than the adder, the excess revenue is deferred. From time to time, SWFPS may utilize a separate rate component (adder adjustment) to manage additional purchased power expenses or excess revenues, respectively. The net purchased power deferral accrued interest at 2.75% and 4.00% of the outstanding balance for the years ended September 30, 2013 and 2012, respectively, based on law, administrative order, or administrative policy.

SWFPS has arrangements with certain customers in which excess power available on the power system is banked with the customer until needed by the power system and the customer has power available. The power system records a receivable for the power banked at the cost specified in the marketing arrangement, under the provisions of ASC Topic 845, *Nonmonetary Transactions*. The net revenue or expense associated with banking activity is deferred until the power is returned or delivered.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(h) Accounts Receivable

SWFPS's accounts receivable consist generally of receivables for power and energy sold to its customers who are primarily public bodies and cooperatives. SWFPS provides for uncollectible accounts if collection is in doubt. No allowance for uncollectible accounts was considered necessary for any year presented herein.

Billing methods used by Southwestern include net billing and bill crediting. Net billing is an agreement between Southwestern and a customer, whereby the customer's power invoice is credited and the funds received from the sale of power are used to fund transmission and generation activities. Net billing is discussed more fully in note 4(b). Bill crediting involves a billing arrangement among Southwestern, a customer, and a third party, whereby the customer's power invoice is credited and the customer pays a third party for goods or services received by Southwestern. Under Southwestern billing methods, purchase and sale transactions are reported "gross" in the combined financial statements.

(i) Concentration of Credit Risk

Financial instruments, which potentially subject SWFPS to credit risk, include accounts receivable for customer purchases of power, transmission, or other products and services. These receivables are primarily with a group of diverse customers that are generally stable, and established organizations, which do not represent a significant credit risk. Although SWFPS is affected by the business environment of the utility industry, management does not believe a significant risk of loss from a concentration of credit exists.

(j) Interest on Payable to U.S. Treasury

Interest on Payable to U.S. Treasury is a cost mandated by the Secretary of Energy and by the FERC. SWFPS computes interest in accordance with DOE Order RA 6120.2, which provides that interest be computed on the remaining investment after revenues have been applied to recovery of costs during the year, any prior year unpaid costs, and also to unpaid Federal investment at the applicable interest rate.

(k) Allowance for Funds Used During Construction

The FERC Uniform System of Accounts defines Allowance for Funds Used During Construction as the net costs for the period of borrowed funds used for construction purposes and a reasonable rate on other funds when so used. While cash is not realized currently from this allowance, it is realized under the rate-making process over the repayment life of the related property through increased revenues resulting from a higher recoverable investment. The interest rates used were 2.75% and 4.00% for the years ended September 30, 2013 and 2012, respectively, based on law, administrative order, or administrative policy.

(l) Retirement Benefits

SWFPS employees participate in one of the following contributory defined benefit plans: the Civil Service Retirement System (CSRS) or Federal Employees Retirement System (FERS). Agency contributions are based on eligible employee compensation and are submitted to benefit program

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

trust funds administered by the Office of Personnel Management (OPM). Based on statutory contribution rates, the fiscal years 2013 and 2012 cost factors under CSRS were 32.3% and 29.8%, respectively, of basic pay. The cost factors under FERS for fiscal years 2013 and 2012 were 14.2% and 13.7%, respectively, of basic pay. The contribution levels, however, are legislatively mandated and do not reflect the current full cost requirements to fund the plans. Costs incurred by OPM on behalf of SWFPS are included as transfers of property and services, net within the Payable to U.S. Treasury on the combined balance sheets.

Other retirement benefits administered by the OPM include the Federal Employees Health Benefits Program (FEHB) and the Federal Employees Group Life Insurance Program (FEGLI). FEHB is calculated at \$5,190 and \$5,817, per enrolled employee, for fiscal years 2013 and 2012, respectively, and FEGLI is based on 0.02% of basic pay for each employee enrolled in these programs.

In addition to the amounts contributed to the CSRS and FERS as stated above, SWFPS recorded an expense and related liability for the pension and other postretirement benefits in the combined financial statements of \$3,363,767 and \$3,536,950 for the years ended September 30, 2013 and 2012, respectively. These amounts reflect the contributions made on behalf of SWFPS by OPM to the benefit program trust funds.

As a Federal agency, all post-retirement activity is managed by OPM, therefore, neither the assets of the plans nor the actuarial data with respect to the accumulated plan benefits relative to Southwestern and the Corps employees are included in this report.

(m) *Transfers of Property and Services, Net*

Transfers of property and services, net is a component of total capitalization that represents the cumulative receipt of transfers of assets or costs offset by the cumulative disbursement of transfers of revenues. Transfers are recognized upon physical delivery of the asset or performance of the service. Transfers occur between projects, project types, and other Federal entities. Transfers between Southwestern and the Corps eliminate upon combination.

(n) *Income Taxes*

As agencies of the U.S. Government, Southwestern and the Corps are exempt from all income taxes imposed by any governing body, whether it is a Federal, state, or commonwealth of the United States.

(o) *Use of Estimates*

The preparation of the combined financial statements in conformity with U.S. GAAP requires management of SWFPS to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include the useful lives of completed utility plant, allowances for doubtful accounts, employee benefit obligations, and other contingencies. Actual results could differ from those estimates.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(p) Non Reimbursable Activities

Non reimbursable activity for the years ended September 30, 2013 and 2012 consists of the following:

	2013	2012
Non reimbursable revenues:		
Non-Federal project revenue	\$ 387,468	378,392
Federal project revenue	1,502,524	(943)
Interest revenue	95,010	80,692
	\$ 1,985,002	458,141
Non reimbursable expenses:		
Non-Federal project expense	\$ 387,468	378,392
Federal project expense	1,502,524	(943)
White River Minimum Flows expense	3,469,469	3,532,827
Spectrum Relocation Fund expense	11,746,365	2,803,865
Other project expense	675,620	26,487
	\$ 17,781,446	6,740,628

Federal and Non Federal Projects

Southwestern has agreements with Federal and non-Federal entities to provide services on a cost basis. Non-Federal entities are required to provide advance payment for Southwestern's services. The operating revenues and expenses related to these services are excluded from the rate-making process. A portion of cash and advances for construction in the accompanying combined financial statements relate to these activities.

Escrow Interest Revenue

Interest revenue represents the interest earned on funds held in escrow. These funds are authorized specifically to fund operation, maintenance, rehabilitation, and modernization activities at hydroelectric generating facilities of the Corps in SWFPS's marketing region. This activity is non reimbursable through the rate-making process.

White River Minimum Flows Project

In accordance with Section 132 of P.L. 109-103, Southwestern implemented the offset to the minimum flows project in fiscal year 2010. Section 132 provided that losses to Federal hydropower shall be offset by a reduction in the costs allocated to the Federal hydropower purpose. Southwestern determined the Federal hydropower impacts to include lost on-peak energy and capacity, lost off-peak energy, increased costs due to dissolved oxygen impacts, and increased maintenance costs at Bull Shoals. This activity is non reimbursable through the rate-making process.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

Spectrum Relocation Fund

In December 2004, the U.S. Congress passed and the President signed the Commercial Spectrum Enhancement Act (CSEA, Title II of P.L. 108-494), creating the Spectrum Relocation Fund (SRF) to streamline the relocation of Federal systems from existing spectrum bands to accommodate commercial use by facilitating reimbursement to affected agencies of relocation costs. In fiscal years 2012, 2009, and 2007, Southwestern received \$17,000,000, \$17,730,000, and \$8,091,360, respectively, in spectrum relocation funds, as approved by the Office of Management and Budget, and as reported to the Congress. In fiscal years 2013 and 2012, Southwestern expensed \$11,746,365 and \$2,803,865, respectively. Expenses incurred represent labor, service contracts, travel, and other administrative costs. This activity is non reimbursable through the rate-making process.

(q) Derivative and Hedging Activities

Southwestern analyzes derivative financial instruments under ASC Topic 815, *Derivatives and Hedging*. This standard requires that all derivative instruments, as defined by ASC Topic 815, be recorded on the combined balance sheets at fair value, unless exempted. Changes in a derivative instrument's fair value must be recognized currently in the combined statement of revenues and expenses, unless the derivative has been designated in a qualifying hedging relationship. The application of hedge accounting allows a derivative instrument's gains and losses to offset related results of the hedged item in the combined statements of revenues and expenses to the extent effective. ASC Topic 815 requires that the hedging relationship be highly effective and that an organization formally designate a hedging relationship at the inception of the contract to apply hedge accounting.

Southwestern enters into contracts for the sale of electricity for use in its business operations. ASC Topic 815 requires Southwestern to evaluate these contracts to determine whether the contracts are derivatives. Certain contracts that literally meet the definition of a derivative may be exempted from ASC Topic 815 as normal purchases or normal sales. Normal purchases and sales are contracts that provide for the purchase or sale of something other than a financial instrument or derivative instrument that will be delivered in quantities expected to be used or sold over a reasonable period of time in the normal course of business. Contracts that meet the requirements of normal purchases or sales are documented and exempted from the accounting and reporting requirements of ASC Topic 815.

Southwestern's policy is to fulfill all derivative and hedging contracts by providing power to a third party as provided for in each contract. Southwestern's policy does not authorize the use of derivative or hedging instruments for speculative purposes such as hedging electricity pricing fluctuations beyond Southwestern's estimated capacity to deliver power. Accordingly, Southwestern evaluates all of its contracts to determine if they are derivatives and, if applicable, to ensure that they qualify and meet the normal purchases and normal sales designation requirements under ASC Topic 815. Normal sales contracts are accounted for as executory contracts as required under U.S. GAAP. As of September 30, 2013 and 2012, Southwestern has no contracts accounted for as derivatives.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(r) Fair Value of Financial Instruments

ASC Topic 825, *Financial Instruments*, requires disclosure of the fair value of financial instruments. The carrying (recorded) value of short-term financial instruments, including cash, funds held in escrow, accounts receivable, accounts payable and accrued liabilities, and advances for construction, approximates the fair value of these instruments because of the short maturity of these instruments. The fair value of certain unfunded and actuarially based liabilities cannot be determined as the future payout dates have yet to be determined.

(2) Utility Plant

Utility plant as of September 30, 2013 and 2012 consists of the following:

	2013	2012
Plant in service:		
Generating facilities	\$ 1,153,886,436	1,139,425,949
Transmission facilities	343,607,996	322,079,152
	1,497,494,432	1,461,505,101
Less accumulated depreciation	(701,560,020)	(675,046,190)
Construction work in progress:		
Generating facilities	191,215,272	160,473,825
Transmission facilities	21,469,139	27,231,883
	212,684,411	187,705,708
Net utility plant	\$ 1,008,618,823	974,164,619

In accordance with FERC guidelines, SWFPS excludes contributed plant within the combined balance sheets to eliminate the impact on power rates. As of September 30, 2013 and 2012, contributed plant, net used in SWFPS's operations totaled \$16,946,019.

(3) Regulatory Assets and Liabilities

Regulatory assets and liabilities as of September 30, 2013 and 2012 consist of the following:

	2013	2012
Regulatory assets:		
Deferred workers' compensation	\$ 13,332,550	14,372,940
Regulatory liabilities:		
Hydropower water storage reallocation deferral	\$ 60,568,075	60,513,411
Purchased power and banking exchange deferral	28,519,474	39,436,080
Total	\$ 89,087,549	99,949,491

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

Southwestern's purchased power and banking exchange deferral account represents the deferral of net revenue or expenses associated with net purchased power and banking exchange activities as follows:

	Purchased power and banking exchange deferral
September 30, 2011	\$ (54,221,980)
Purchased power adder revenue	(11,961,869)
Purchased power expense	28,635,408
Net banking exchange	(13,742)
Net purchased power and banking exchange deferral	<u>16,659,797</u>
Interest on deferred activities and other	<u>(1,873,897)</u>
September 30, 2012	<u>(39,436,080)</u>
Purchased power adder revenue	(15,782,791)
Purchased power expense	27,950,908
Net banking exchange	(55,678)
Net purchased power and banking exchange deferral	<u>12,112,439</u>
Interest on deferred activities and other	<u>(1,195,833)</u>
September 30, 2013	<u>\$ (28,519,474)</u>

(4) Financing Sources

SWFPS's financing sources include annual appropriations, Federal power receipts (Use of Receipts), and alternative financing arrangements to fund its operations.

(a) Payable to U.S. Treasury

Construction and operation of Southwestern's transmission system and the Corps' generating facilities and operations are financed through congressional appropriations. The exceptions are capital assets and maintenance activities funded through the alternative financing arrangements and the funding by non-Federal parties of the construction of the Robert Douglas Willis project. The U.S. Government's investment in each generating project and each year's investment in the transmission system is to be repaid to the Treasury over a period not to exceed 50 years from the time the facility is placed in service. There is no requirement for repayment of a specific amount on an annual basis.

Revenues received from the sale of Federal power and purchased power are generally deposited with the Treasury. Annual revenues are first applied to the current year operating expenses (less depreciation) and interest expense. All annual amounts for such expenses have been paid through fiscal year 2013. Remaining revenues are to be first applied to repayment of operating deficits

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(which include all expenses except depreciation), if any, and then to repayment of the Payable to U.S. Treasury. To the extent possible, while still complying with the repayment period established for each increment of investment and unless otherwise required by legislation, repayment of the investment is to be accomplished by a repayment of the highest interest-bearing investment first. Interest rates applied to the unamortized initial investment of the U.S. Government in the Corps' hydroelectric generating facilities range from 2.50% to 5.75% for unpaid facilities in service prior to fiscal year 2013 and 2.75% for facilities placed in service during fiscal year 2013. The rates have been set by law, by administrative order pursuant to law, or by administrative policies using the U.S. Senate Document No. 97 formula for the fiscal year during which the appropriations were requested.

(b) Alternative Financing

Due to fluctuations in the amount of annual appropriations received to fund operations, maintenance, rehabilitation, and modernization of the SWFPS facilities, SWFPS has established an alternative financing program under reimbursable authority regulations. Under agreements with customers to finance projects, which benefit the SWFPS, funds received from the sale of power are net billed, allowing a portion of the funds to be utilized to finance agreed-upon projects rather than returned to the Treasury. Under the agreements with certain customers, alternative financing restricted specifically to fund operation, maintenance, rehabilitation, and modernization activities at the hydroelectric generating facilities are held in escrow. All other alternative financing arrangements are collected by Southwestern and deposited as cash held by the Treasury, and are reflected as other assets with an offsetting liability included in advances for construction, until completion of the project at which time the asset and liability are eliminated.

(5) Commitments and Contingencies**(a) General**

Based on the 2013 Integrated System Power Repayment Study prepared as of September 30, 2013, the projected increase in capital investment in 2013 is \$90,467,922, which includes \$19,927,276 for transmission facilities and \$70,540,646 for generating facilities. The five-year investment increase projected in the 2013 Integrated System Power Repayment Study for fiscal years 2013 through 2017 is estimated to cost \$698,006,666. It is reasonably possible that a change in estimate will occur.

Southwestern sells the majority of its marketable power to customers under long-term power sales contracts of 15 years, which require Southwestern to provide 1,200 kilowatt hours per kilowatt of peaking contract demand per year, subject to scheduling constraints outlined in each customer's contract. If sufficient power is unavailable to Southwestern from Corps hydroelectric facilities to meet these commitments, Southwestern may be required to purchase power from other sources to meet these commitments. The cost to purchase such power is recovered through the purchased power adder discussed more fully in note 1(g).

(b) Legal

SWFPS has exposure to certain claims and legal actions arising in the ordinary course of business. In management's opinion, any resulting actions will not have a material adverse effect on the financial condition or results of operations of SWFPS as of September 30, 2013 and 2012.

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(6) Leases

SWFPS is obligated under a 10-year operating lease for office space. This lease consists of a five-year firm term for the first five years and the option to terminate during the second five-year term. This lease commenced January 1, 2004 and is scheduled to terminate December 31, 2013. Future minimum lease payments as of September 30, 2013 are as follows:

Year ending September 30:		
2014	\$	<u>178,000</u>
Total future minimum lease payments	\$	<u><u>178,000</u></u>

Rent expense for operating leases during the years ended September 30, 2013 and 2012 was \$743,000 and \$713,000, respectively.

SWFPS extended the lease for office space on January 1, 2014. The lease is a 20-year operating lease for office space, which commenced January 1, 2014 and is scheduled to terminate December 31, 2033. This lease consists of a 10-year firm term for the first 10 years and the option to terminate during the second 10-year term. Future minimum lease payments as of September 30, 2013 are as follows:

Year ending September 30:		
2014	\$	552,000
2015		742,000
2016		751,000

SOUTHWESTERN FEDERAL POWER SYSTEM

Notes to Combined Financial Statements

September 30, 2013 and 2012

(7) Related Parties

As components of DOE and DOD, these departments are considered related parties to Southwestern and the Corps. Southwestern has certain agreements with DOE and DOD components to provide electric power, transmission services, and other services. As of September 30, 2013 and 2012, amounts outstanding in accounts receivable relating to DOE and DOD components totaled \$268,783 and \$248,434, respectively; for the years ended September 30, 2013 and 2012, total operating revenues earned from DOE and DOD sources totaled \$3,646,463 and \$3,468,290, respectively.

(8) Subsequent Events

On September 30, 2013, the Deputy Secretary of Energy approved on an interim basis a change to the Integrated System rate schedules and the new rate schedules incorporated a 4.7% increase. The rate schedules were placed into effect October 1, 2013 and will remain in effect through September 30, 2017.

On September 30, 2013, the Deputy Secretary of Energy approved a 7.1% increase for the Sam Rayburn Dam project on an interim basis for the period October 1, 2013 through September 30, 2017.

SWFPS has evaluated subsequent events from the balance sheet date through June 18, 2014, the date at which the combined financial statements were available to be issued, and such events are disclosed in these accompanying notes.

Schedule 1

SOUTHWESTERN FEDERAL POWER SYSTEM

Combining Schedule of Balance Sheet Data

September 30, 2013

Assets	Southwestern	Corps	Total
