Subject: AK LNG export license application: FE Docket No. 14-96-LNG
Date: Thursday, November 06, 2014 1:30:46 PM

I am in support of the granting of an export license in conjunction with FE Docket No. 14-96-LNG.

The State of Alaska is a resource rich State but infrastructure poor when compared to the lower 48 States. This unique position requires that major projects be viewed differently for Alaska because the economy of Alaska is dependent on resource development as the primary basis of jobs and tax revenues. Less than 1% of the land in Alaska has been developed and infrastructure of this type is critically needed to support economic development for all Alaskans.

The size of the project at \$45 to \$65 billion dollars requires the long lead time requested in the application.

Another significant benefit to Alaska would be the availability of clean, cost effective energy for residents. Alaska has more fossil fuel reserves than most States yet has the highest cost for energy. This project would significantly assist with bringing affordable energy to all Alaskans.

Thank you for your time.

Bruce Harland
