

Rec'd DOE/FE 10/24/14

**From:** [Miller, Mike](#)  
**To:** [FERGAS](#)  
**Subject:** FE Docket No. 14-96-LNG  
**Date:** Friday, October 24, 2014 3:39:43 PM

---

Please consider the following when reviewing the Alaska LNG Project LLC application ( FE Docket No. 14-96-LNG):

1. There would be approximately 15,000 construction jobs and 1,000 operations jobs created by this project.
2. This is the single most important infrastructure project for Alaska's economic future.
3. The Alaska LNG project would provide significant economic benefits to Alaskans, including state revenues, new job opportunities and access to decades of instate natural gas for Alaskan homes and businesses.
4. The Alaska LNG project is unprecedented in size and complexity and is expected to cost \$45 billion to \$65 billion to design and construct.
5. The Alaska LNG project would provide significant benefits across the United States as a whole.
6. The unique nature and unprecedented investment required for this project justifies the requested 30-year export term and 12-year commencement term.
7. The difficulties of constructing a mega-project of this magnitude in an arctic environment supports a 12-year period prior to the project's commencement.
8. Abundant natural gas resources on the North Slope of Alaska support the 30-year export term and the long-term needs of Alaskans for domestic use.
9. Alaska is distinct from the Lower 48 so this application should not be subject to DOE's existing Order of Precedence for Processing Non-FTA LNG export applications nor should it be subject to any new procedures adopted as a result of DOE's proposed procedural change for processing Non-FTA LNG export applications.
10. The existing Presidential Finding Concerning Alaska Natural Gas is valid and applicable to the Alaska LNG Project.

We look forward to this license being granted so that our children and grand-children may live and work in Alaska

**Mike**
