AUDIT REPORT

Department of Energy's Nuclear Waste Fund's
Fiscal Year 2014 Financial Statement Audit

OAS-FS-15-03

November 2014

Department of Energy
Washington, DC 20585

November 24, 2014

MEMORANDUM FOR THE DIRECTOR, OFFICE OF STANDARD CONTRACT
MANAGEMENT

A handwritten signature in blue ink, appearing to read "Rickey R. Hass".

FROM: Rickey R. Hass
Deputy Inspector General
for Audits and Inspections
Office of Inspector General

SUBJECT: INFORMATION: Audit Report on "Department of Energy's Nuclear
Waste Fund's Fiscal Year 2014 Financial Statement Audit"

The attached report presents the results of the independent certified public accountants' audit of the Department of Energy's Nuclear Waste Fund's balance sheets, as of September 30, 2014 and 2013, and the related statements of net cost, changes in net position, and budgetary resources for the years then ended.

To fulfill the Office of Inspector General's (OIG) audit responsibilities, we contracted with the independent public accounting firm of KPMG, LLP (KPMG) to conduct the audit, subject to our review. KPMG is responsible for expressing an opinion on the Fund's financial statements and reporting on applicable internal controls and compliance with laws and regulations. The OIG monitored audit progress and reviewed the audit report and related documentation. This review disclosed no instances where KPMG did not comply, in all material respects, with generally accepted Government auditing standards. The OIG did not express an independent opinion on the Fund's financial statements.

KPMG concluded that the financial statements present fairly, in all material respects, the respective financial position of the Fund as of September 30, 2014 and 2013, and its net costs, changes in net position, and budgetary resources for the years then ended, in conformity with United States generally accepted accounting principles.

The auditors' review of the Fund's internal control structure and compliance with certain laws and regulations disclosed no deficiencies or instances of noncompliance required to be reported under generally accepted Government auditing standards or applicable Office of Management and Budget guidance.

Report Number: OAS-FS-15-03

Management's Discussion & Analysis

Reporting Entity

The Nuclear Waste Policy Act of 1982 (NWPA) (Public Law 97-425) established the Office of Civilian Radioactive Waste Management (OCRWM) within the United States (U.S.) Department of Energy (Department or DOE). OCRWM's mission was to manage and dispose of the Nation's spent nuclear fuel (SNF) and high-level radioactive waste (HLW). The Nuclear Waste Policy Amendments Act of 1987 (Title V, Public Law 100-203) directed the Secretary of Energy to characterize only the Yucca Mountain site in Nevada as a candidate site to determine if it was suitable for a repository for SNF and HLW.

The characterization of the Yucca Mountain site was completed and in 2008 OCRWM submitted a license application to the U.S. Nuclear Regulatory Commission (NRC or the Commission) seeking authorization to construct the Yucca Mountain repository. In fiscal year (FY) 2009, the Obama Administration decided to terminate the Yucca Mountain Project. On January 29, 2010, at the direction of the President, the Secretary announced the formation of the Blue Ribbon Commission (BRC) and on February 1, 2010, the President issued the FY 2011 Budget Request with a zero budget request for OCRWM. No funds were requested in the FY 2014 or FY 2013 Budget Requests. On March 3, 2010 the Department filed a motion to withdraw with prejudice the Yucca Mountain License Application pending before the Atomic Safety and License Board (ASLB) of the NRC. On June 29, 2010, the ASLB issued an order denying the Department's motion to withdraw the License Application, which the Department appealed to the NRC, the body with final authority over NRC decision-making. On October 1, 2010 the Department shifted OCRWM program responsibilities to various Departmental Program Secretarial Offices.

Funds remaining from OCRWM have been used between October 1, 2010 and September 30, 2014 to continue the management of the Nuclear Waste Fund (NWF), litigation activities, and for additional closure activities. The funds are managed by the Office of Nuclear Energy.

On July 29, 2011, a lawsuit was filed against the NRC in the U.S. Court of Appeals for the District of Columbia Circuit requesting a writ of mandamus ordering the NRC to continue reviewing the Yucca Mountain license application

On September 9, 2011, the NRC issued its decision in which the Commission (1) announced it was split evenly on the question whether the NRC's ASLB had properly refused to allow the Department's motion to withdraw the Yucca Mountain construction license application with prejudice, and (2) unanimously held that "budgetary limitations" required the ASLB to dispose of pending matters by the end of FY 2011 and to document the history of the adjudicatory process. On September 30, 2011, the Board issued a memorandum and order suspending the adjudicatory portion of the licensing proceeding due to uncertainty regarding the availability of future appropriations from the NWF to pay for future proceeding and a lack of staff to continue the proceeding since the President's fiscal year 2012 budget request for Yucca Mountain high-level waste activities did not include a request for any full-time equivalent positions. The adjudicatory portion of the licensing proceeding remains suspended.

The BRC submitted a final report in January 2012 with its recommendations for consideration by the Administration and Congress, as well as interested state, tribal and local governments, other stakeholders, and the public.

On August 13, 2013, the U.S. Court of Appeals for the District of Columbia Circuit issued a writ of mandamus to the NRC to promptly continue with the legally mandated licensing proceeding unless and until Congress authoritatively says otherwise or there are no appropriated funds remaining.

On November 18, 2013 the NRC requested the Department of Energy to prepare the supplemental environmental impact statement (EIS) that the NRC staff determined was needed for purposes of the review of the application under the National Environmental Policy Act (NEPA). On February 28, 2014 the Department wrote to the NRC that it would provide to the NRC an updated version of the report it provided to the NRC on July 30, 2009, entitled, *Analysis of Postclosure Groundwater Impacts for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada*. The updated report was provided by the DOE to the NRC on October 3, 2014. The analysis provides the NRC with substantially all of the technical information necessary to inform a draft EIS.

Fiscal Year 2014 and 2013 Financial Performance

The principal financial statements have been prepared to report the financial position and results of operations of the entity, pursuant to the requirements of 31 United States Code 3515 (b). While the statements have been prepared from the books and records of the entity in accordance with Generally Accepted Accounting Principles for Federal entities and the formats prescribed by Office of Management and Budget (OMB), the statements are in addition to the financial reports used to monitor and control budgetary resources, which are prepared from the same books and records. The statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity.

The NWF consists of fees paid by the owners and generators of SNF from commercial reactors, in accordance with provisions of their contracts with the Department for disposal services. NWF assets in excess of those authorized by Congress to pay NWPA costs are invested in U.S. Treasury securities. On November 19, 2013, the U.S. Court of Appeals for the District of Columbia Circuit found that the Department did not have a legitimate basis to evaluate the ongoing fee and directed the Department to reduce the ongoing fee to zero. The Department complied and sent out notices to utilities that the ongoing fee would change to zero on May 16, 2014. The NWPA originally provided that the federal government would pay the costs of defense-generated nuclear waste directly into the Nuclear Waste Fund. However, Congress in 1993 changed that requirement to instead establish a separate Defense Nuclear Waste Disposal Appropriation (DNWDA). As of September 30, 2014, cumulative revenue from fees and the DNWDA, totaled approximately \$25.4 billion; and cumulative interest earnings and other revenue totaled approximately \$22.0 billion. Cumulative expenditures by the Department from appropriations and amounts authorized by Congress, including direct appropriations to the NRC, the now defunct Office of the Nuclear Waste Negotiator, and the Nuclear Waste Technical Review Board, totaled approximately \$11.4 billion.

As of September 30, 2014, the U.S. Treasury securities held by the Department related to the NWF had a market value of \$39.8 billion compared to \$36.6 billion at the end of fiscal year FY2013. Investment income and net gains from the maturity of securities totaled \$1.4 billion for FY 2014 and FY 2013, respectively.

ANALYSIS OF SYSTEMS, CONTROLS, AND LEGAL COMPLIANCE

Analysis of systems, controls, and legal compliance is performed, reported, and audited at the Departmental level. The results of these reviews and assessments are incorporated in the Department's Annual Financial Report. A significant issue, Used Fuel and High Level Waste Disposal, was reported by management in FY 2014 and FY 2013 and is described below.

Federal Managers' Financial Integrity Act

The Federal Managers' Financial Integrity Act (FMFIA) of 1982 requires that agencies establish internal control and financial systems to provide reasonable assurances that the integrity of Federal programs and operations are protected. Furthermore, it requires that the head of the agency provide an annual assurance statement on whether the agency has met this requirement and whether any material weaknesses exist.

In response to the FMFIA, the Department developed an internal control program which holds managers accountable for the performance, productivity, operations, and integrity of their programs through the use of management controls. Annually, senior managers at the Department are responsible for evaluating the adequacy of the internal controls surrounding their activities and determining whether they conform to the principles and standards established by the Office of Management and Budget, and the Government Accountability Office. The results of these evaluations and other senior management information are used to determine whether there are any internal control problems to be reported as material weaknesses. The Departmental Internal Control and Audit Review Council, the organization responsible for oversight of the Management Control Program, makes the final assessment and decision for the Department.

Significant Issue - USED FUEL AND HIGH LEVEL WASTE DISPOSAL

The government's acceptance of spent nuclear fuel and high-level radioactive waste, authorized under the NWSA, has been delayed by various factors.

Actions Taken and Remaining

The Secretary, acting at the direction of the President, established the BRC on America's Nuclear Future to conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle, including all alternatives for the storage, processing, and disposal of civilian and defense used nuclear fuel, high-level waste, and materials derived from nuclear activities. The BRC submitted a final report in January 2012 with their recommendations for consideration by the Administration and Congress. The Administration issued the "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Waste" on January 11, 2013 (Strategy Document), which is primarily based on the BRC's recommendation, but no Congressional action has been taken to date. The Key assumptions from the Strategy Document are that (1) spent nuclear fuel remains on all sites until 2021 at which time an interim storage facility will open and begin receiving spent nuclear fuel and (2) reactors will incur costs reimbursable by the Department until it fulfills its contractual obligations. The Department continues to perform research and development, analytical, and planning activities that lay the groundwork for implementing the Strategy.

Independent Auditors' Report

United States Department of Energy Inspector General
United States Department of Energy's Nuclear Waste Fund:

Report on the Financial Statements

We have audited the accompanying financial statements of the United States (U.S.) Department of Energy's (Department) Nuclear Waste Fund (Fund), which comprise the balance sheets as of September 30, 2014 and 2013, and the related statements of net cost, changes in net position, and budgetary resources for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin Number (No.) 14-02, *Audit Requirements for Federal Financial Statements*. Those standards and OMB Bulletin No. 14-02 require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion on the Financial Statements

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Fund as of September 30, 2014 and 2013, and its net costs, changes in net position, and budgetary resources, for the years then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As discussed in Note 9 to the financial statements, the Department is involved as a defendant in several matters of litigation relating to its inability to accept waste by the January 31, 1998 date specified in the Nuclear Waste Policy Act of 1982, as amended. The Fund has recorded an estimate of its liability related to this matter of \$22.6 billion, and \$21.4 billion as of September 30, 2014 and 2013, respectively. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the information in the Management's Discussion and Analysis and Required Supplementary Stewardship Information sections be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audits of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the basic financial statements as a whole. The supplementary information included in Supplementary Information – Schedules I and II for the thirty two years ended September 30, 2014 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated in all material respects in relation to the basic financial statements as a whole.

We have also previously audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Fund as of and for each of the years ended September 30, 1983 through September 30, 2012 (none of which are presented herein), and we expressed unqualified opinions on those financial statements. The supplementary information included in Schedules I and II related to the Fund's financial statements as of and for each of the years ended September 30, 1983 through September 30, 2012 was subjected to auditing procedures applied in the audits of those financial statements, and in our opinion, is fairly stated in all material respects in relation to the financial statements from which it has been derived.

Other Reporting Required by *Government Auditing Standards*

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements as of and for the year ended September 30, 2014, we considered the Fund's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, we do not express an opinion on the effectiveness of the Fund's internal control. We did not test all internal controls relevant to operating objectives as broadly defined by the *Federal Managers' Financial Integrity Act of 1982*.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Fund's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, and contracts, noncompliance with which could have a direct and material effect on the determination of financial statement amounts, and certain provisions of other laws and regulations specified in OMB Bulletin No. 14-02. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests of compliance disclosed no instances of noncompliance or other matters that are required to be reported herein under *Government Auditing Standards* or OMB Bulletin No. 14-02.

Purpose of the Other Reporting Required by Government Auditing Standards

The purpose of the communication described in the Other Reporting Required by *Government Auditing Standards* section is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the Fund's internal control or compliance. Accordingly, this communication is not suitable for any other purpose.

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(1) Legislative Background

The Nuclear Waste Policy Act of 1982 (NWPA) was signed into law on January 7, 1983. The NWPA establishes a framework for the financing, siting, licensing, operating and decommissioning of one or more mined geologic repositories for the Nation's spent nuclear fuel (SNF) and high-level radioactive waste (HLW) which is to be carried out by the Department of Energy (Department or DOE). In addition, the NWPA contains other provisions including:

- Assigning responsibility for the payment of disposal costs to the owners and generators of SNF and HLW and creating a special Nuclear Waste Fund (NWF) within the Department of Treasury of the United States for the collection of fees to cover such costs;
- Providing for contracts between the Department and the owners and generators of SNF and HLW pursuant to which the Department is to take title to the SNF or HLW as expeditiously as possible, following commencement of repository operations and, in return for payment of fees established by the NWPA, to begin disposal of the SNF or HLW not later than January 31, 1998; and
- Requiring evaluation of the use of civilian disposal capacity for the disposal of HLW resulting from atomic energy defense activities (defense waste). In April 1985, the President notified the Department of his determination that a separate defense waste repository was not necessary and directed the Department to proceed with arrangements for disposal of such waste. Fees, equivalent to those paid by commercial owners, must be paid for this service by the Federal Government.

On December 22, 1987, the President signed into law the Budget Reconciliation Act, Subtitle A Title V, of which contained amendments to the NWPA. The legislation directed the Department to characterize only the Yucca Mountain site in Nevada as a candidate site for the first repository. The legislation also provided for the termination of site-specific activities at all candidate sites other than the Yucca Mountain site, within 90 days of enactment, and for phasing out, not later than six months after enactment, all research programs in existence that were designed to evaluate the suitability of crystalline rock as a potential repository host medium.

In fiscal year (FY) 2009, the President and the Department Secretary announced that a repository at Yucca Mountain was not a workable option and that the repository program would be terminated. At that time, they also announced that a Blue Ribbon Commission would be established to evaluate disposal alternatives. Accordingly, on January 29, 2010, the Department Secretary announced the formation of a Blue Ribbon Commission on America's Nuclear Future to provide recommendations for developing a safe, long-term solution to managing the Nation's used nuclear fuel and nuclear waste. The Blue Ribbon Commission submitted a final report in January 2012 with their recommendations on these issues for consideration by the Administration and Congress, as well as interested state, tribal and local governments, other stakeholders, and the public. On February 1, 2010, the President issued the FY 2011 Budget Request with a zero budget request for the Nuclear Waste Fund Appropriation and the Defense Nuclear Waste Disposal Appropriation (formerly known as and reported under the Office of Civilian Radioactive Waste Management (OCRWM) prior to FY 2011). Consequently, the Department closed OCRWM on September 30, 2010, and, on October 1, 2010, the Department reassigned prior responsibilities for the operations of OCRWM and its assets and liabilities within the Department, herein referred to as the NWF.

NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(2) Significant Accounting Policies

Basis of Presentation – These financial statements have been prepared to report the financial position and results of operations of the NWF and include all activity related to the Nuclear Waste Fund Appropriation and the Defense Nuclear Waste Disposal Appropriation, used for the disposal of SNF and HLW (formerly reported under the Office of Civilian Radioactive Waste Management). The financial statements have been prepared from the books and records of the Department for the NWF in accordance with accounting principles generally accepted in the United States of America as applicable to Federal entities.

Basis of Accounting – The NWF’s financial statements are prepared using the accrual method of accounting. Under the accrual method, revenues are recognized when earned, and expenses are recognized when a liability is incurred without regard to receipt or payment of cash. The NWF also uses budgetary accounting to facilitate compliance with legal constraints and to monitor its budget authority.

Revenue Recognition – Fees, related accrued interest, and investment income are recognized as exchange (earned) revenue to the extent of expenses incurred, subject to Congressional authorization as discussed below. Fees billed, related accrued interest, and investment income in excess of current expenses are deferred.

The NWPA requires the civilian owners and generators of nuclear waste to pay their share of the full cost of the NWF and, to that end, establishes a fee for electricity generated and sold by civilian nuclear power reactors which the Department must collect and annually assess to determine its adequacy. A one-time fee (see Note 5) was recorded by the NWF as of April 7, 1983, related to the disposal of SNF generated prior to that date. Fees recognized by the NWF are based upon kWh of electricity generated and sold by civilian nuclear reactors on and after April 7, 1983.

Fees associated with the disposal of the Department’s SNF and HLW are also recognized as the related costs are incurred and allocated. To estimate the share of the total Program costs that should be allocated to the Department, the methodology announced by the Department in the Federal Register in August 1987 was used. Department management periodically updates the *Analysis of the Total System Life Cycle Cost of the Civilian Radioactive Waste Management Program* (TSLCC), which establishes the amounts to allocate. The most recent TSLCC was issued in 2008.

Appropriations – Expenditure authority for the NWF has historically been provided by two separate appropriations.

- For fiscal years 2014 and 2013, Congress appropriated \$0 from the Defense Nuclear Waste Disposal Appropriation to be used for nuclear waste disposal activities. For fiscal year 2013 Congress issued a Prior Year Reduction of \$727.
- For fiscal years 2014 and 2013, Congress appropriated \$0 from the Nuclear Waste Disposal Appropriation to be used for nuclear waste disposal activities.

Fee payments and investment income are deposited into the NWF account and are made available to the Department through the annual expenditure authority provided by Congress. Investments are made in United States (U.S.) Treasury securities from funds in excess of current needs. If, at any time, monies available in the NWF are insufficient to discharge responsibilities under the NWPA, borrowings may be made from the U.S. Treasury. The NWPA limits the NWF from incurring expenditures, entering into contracts, and obligating amounts to be expended except as provided in advance by appropriation acts. Appropriated dedicated receipts such as these are excluded from appropriations received on the *Statements of Changes in Net Position*.

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(2) Significant Accounting Policies (continued)

Imputed Financing Sources – In certain instances, costs of the NWF are paid out of funds appropriated to other federal agencies. For example, payments under the terms of settlements and judgments are paid by the U.S. Treasury Judgment Fund (Judgment Fund). When costs directly attributable to NWF's operations are paid by other agencies, NWF recognizes these amounts in the *Statements of Net Cost*. In addition, these amounts are recognized as imputed financing sources in the *Statements of Changes in Net Position*.

Funds from Dedicated Collections – NWF follows Statement of Federal Financial Accounting Standards (SFFAS) No. 43, *Funds from Dedicated Collections*, which requires separate identification of funds from dedicated collections on the Balance Sheets, Statements of Changes in Net Position, and other selected footnotes.

Funds from dedicated collections are financed by specifically identified revenues, often supplemented by other financing sources, which remain available over time. These specifically identified revenues and other financing sources are required by statute to be used for designated activities, benefits or purposes, and must be accounted for separately from the Government's general revenues (see Note 11).

Investments – Investments are in U.S. Treasury securities and are stated at cost net of amortized premiums and discounts as it is the Department's intent to hold the investments to maturity. Premiums and discounts are amortized using the effective interest yield method (see Note 4).

General Property, Plant, and Equipment – Purchases of general property, plant, and equipment (PP&E) exceeding \$50 are capitalized if they have a useful life greater than two years. PP&E is depreciated on a straight-line basis over the estimated useful lives of the assets. Useful lives range from 5 to 30 years. Maintenance costs are borne by NWF for equipment either on loan from or shared with other programs.

Accounts Receivable – Payment of accounts receivable will not be complete until NWF starts accepting waste. Interest is accrued quarterly on the outstanding amount receivable including accrued interest. The interest rate used is the 13-week U.S. Treasury bill rate. An allowance for doubtful accounts related to one-time spent fuel fees has not been recorded as of September 30, 2014 or 2013, as NWF is not obligated to accept waste without payment of fees.

Accrued Investment Interest Receivable – Investment interest is accrued on the outstanding investment balance using the applicable interest rate for the investments.

Liabilities – Liabilities represent the amount of monies or other resources that are likely to be paid by NWF as the result of a transaction or event that has already occurred. However, no liability can be paid by NWF absent an appropriation. Liabilities for which an appropriation has not been enacted are therefore classified in these notes as liabilities not covered by budgetary resources and there is no certainty that the appropriation will be enacted. Also, liabilities other than contracts can be abrogated by the Government acting in its sovereign capacity.

Tax Status – NWF, as a part of the Department of Energy, which is a Federal agency, is not subject to federal, state, or local income taxes.

First Repository Costs – For the fiscal years ended September 30, 2014 and 2013, first repository costs consist primarily of Yucca Mountain shutdown costs. Historically, the general goals have been that of licensing and construction of a permanent repository for nuclear waste at Yucca Mountain and to be ready for acceptance of waste at the facility.

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(2) Significant Accounting Policies (continued)

Retirement Plans – Contractor Employees – NWF follows the requirements of the Financial Accounting Standards Board’s Accounting Standard’s section Codification 715, “*Compensation – Retirement Benefits*” for contractor employees. NWF’s former integrated contractors maintain defined benefit pension plans under which they promise to pay employees specified benefits, such as a percentage of the final average pay for each year of service. NWF’s cost under the contract includes reimbursement of annual employer contributions to the pension plans. NWF was historically the predominant fund for one integrated contractor and therefore recorded the net assets or liabilities of that former contractor’s plans as if it were the plan sponsor. In FY 2011, the NWF made additional contributions to fully fund that former contractor’s defined benefit pension plan and thus significantly reduce or eliminate required future contributions. The remaining net assets or liabilities of that former contractor’s plans are the responsibility of the NWF and therefore continue to be reflected in the NWF statements.

Use of Estimates – The preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Significant items subject to such estimates and assumptions include accounts receivable, estimated lives of general property, plant, and equipment and commitments and contingencies.

(3) Fund Balance with Treasury

Summaries of the status of fund balances with the U.S. Treasury for appropriated and special funds as of September 30, 2014 and 2013 are as follows:

As of September 30, 2014	Appropriated		Total
	Funds	Special Funds	
Unobligated budgetary resources			
Available	\$ 5,617	\$ 10,617	\$ 16,234
Obligated balance not yet disbursed			
Undelivered orders	13,432	10,460	23,892
Accounts payable and deposit fund liabilities	652	312	964
Budgetary resources invested in Treasury securities	-	(19,890)	(19,890)
Total FY 2014 Fund Balance with Treasury	\$ 19,701	\$ 1,499	\$ 21,200

As of September 30, 2013	Appropriated		Total
	Funds	Special Funds	
Unobligated budgetary resources			
Available	\$ 8,591	\$ 8,082	\$ 16,673
Obligated balance not yet disbursed

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(4) Investments and Related Interest, Net

For the fiscal years ended September 30, 2014 and 2013, the NWF received proceeds from the maturity of securities of \$1,303,723 and \$1,514,135, respectively.

Investments in U.S. Treasury securities held as of September 30 of each year consisted of the following:

	FY 2014	FY 2013
Intragovernmental Non-Marketable Market Based:		
Face Value	\$ 51,526,691	\$ 50,597,936
Unamortized discount, net	(18,695,762)	(19,800,566)
Interest receivable	77,923	66,519
Investments and related interest, net	32,908,852	30,863,889
Unrealized market gains, net	6,844,450	5,688,686
Investments at fair value	\$ 39,753,302	\$ 36,552,575

The federal government does not set aside assets to pay for expenditures associated with the funds for which the Department holds Treasury securities. These Treasury securities are an asset to the Department and a liability to Treasury. Because the Department and Treasury are both parts of the federal government, these assets and liabilities offset each other from the standpoint of the federal government as a whole. For this reason, they do not represent an asset or a liability in the U.S. Government-wide financial statements. Treasury securities provide the Department with authority to draw upon the U.S. Treasury to make expenditures, subject to available appropriations and Office of Management and Budget (OMB) apportionments. When the Department requires redemption of these securities, the federal government finances those expenditures out of accumulated cash balances by raising taxes or other receipts, by borrowing from the public, repaying less debt, or by curtailing other expenditures. This is the same way the federal government finances all other expenditures.

(5) Receivables Due from Utilities

Owners and generators of civilian SNF and HLW have entered into contracts with the Department for disposal services and for payment of fees to the NWF.

The NWPA specifies two types of fees to be paid to the NWF for disposal services: (a) a one-time charge per kilogram of heavy metal in solidified SNF or HLW existing prior to April 7, 1983; and (b) a one mil per kWh fee on all net electricity generated and sold by civilian nuclear power reactors on and after April 7, 1983. The kWh fees are due when billed. The contracts between the Department and the owners and generators of the waste provide three options for payment of the one-time spent fuel fee, one of which must have been selected by June 30, 1985, or within two years of contract execution. The options were:

1. Payment of the amount due, plus interest earned from April 7, 1983, in 40 quarterly installments with the final payment due on or before the first scheduled delivery of SNF to the Department;
2. Payment of the amount due, plus interest from April 7, 1983, in a single payment any time prior to the first delivery of SNF to the Department; or

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(5) Receivables Due from Utilities (continued)

3. Payment of the amount due any time prior to June 30, 1985, or two years after contract execution, in the form of a single payment, with no interest due.

Under options (1) and (2), interest accrues from April 7, 1983, to date of first payment at the 13-week U.S. Treasury bill rate compounded quarterly. Under option (1), beginning with the first payment, interest is calculated at the 10-year Treasury note rate in effect at the time.

For the fiscal years ended September 30, 2014 and 2013 there were no payments or adjustments of one-time spent fuel fees by owners and generators of civilian SNF and HLW.

The Secretary of Energy shall annually review the adequacy of the fees established. In the event the Secretary of Energy determines either insufficient or excess revenue is being collected, the Secretary of Energy shall propose an adjustment to the fee to ensure full cost recovery. Because the U.S. Court of Appeals for the District of Columbia Circuit found the Department did not have a legitimate basis to evaluate the ongoing kWh fee, the court directed the Department to propose to Congress a reduction of the ongoing kWh fee to zero. Such proposal became effective on May 16, 2014. In August 2014, the Department collected the remaining ongoing fee receivable balances.

Accounts receivables from public and Federal utilities at September 30 of each year were as follows:

	FY 2014	FY 2013
Accounts receivable:		
Accounts receivable - intragovernmental utilities		
Kilowatt hour fees	\$ -	\$ 13,803
Accounts receivable - public utilities		
Kilowatt hour fees	-	161,916
One-time spent nuclear fuel fees:		
Accounts receivable - one-time spent nuclear fuel fees		
Option (1)	144,273	144,273
Option (2)	692,672	692,672
Total accounts receivable one-time spent nuclear fuel fees	836,945	836,945
Accrued interest on one-time spent nuclear fuel fees:		
Option (1)	385,992	385,776
Option (2)	1,861,053	1,860,104
Total accrued interest on one-time spent nuclear fuel fees	2,247,045	2,245,880
Total accounts receivable - public utilities	3,083,990	3,244,741
Total accounts receivable - utilities	\$ 3,083,990	\$ 3,258,544

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

6) General Property, Plant, and Equipment, Net

General property, plant, and equipment and related accumulated depreciation consisted of the following as of September 30, 2014 and 2013:

	FY 2014	FY 2013
General property, plant, and equipment	\$ 10,952	\$ 12,182
Less accumulated depreciation	(10,721)	(11,879)
General property, plant, and equipment, net	\$ 231	\$ 303

(7) Transactions with the Department and Other Federal Government Agencies

The NWPA authorized the Secretary of Energy to carry out the provisions of the NWPA and created the Nuclear Waste Fund in the U.S. Treasury. The investment and borrowing powers of the NWF are limited to transactions with the U.S. Treasury. In discharging its obligations under the NWPA, the Department contracts for services with numerous contractors including other Federal Government agencies. Further, significant administrative services are provided by the Department.

As of September 30, 2014 and 2013, NWF owed other Federal Government agencies \$109 and \$236, respectively, for services and costs provided to NWF. For the fiscal years ended September 30, 2014 and 2013, NWF incurred costs of \$492 and \$2,157, respectively, for services and goods provided by other Federal Government agencies. In addition to these incurred costs, NWF made Congressional authorized transfers from the NWF to the Nuclear Waste Technical Review Board in the amount of \$3,400 for fiscal years 2014 and 2013.

NWF has entered into Memoranda of Agreement (MOA) with the Department's Office of Environmental Management and the Department's Office of Naval Nuclear Propulsion. The MOA established the terms and conditions for acceptance of Department-owned SNF and HLW (Defense Waste) for disposal. The estimated liabilities are included in the 2008 TSLCC that is used to calculate the estimate of the Department's share of total current and future program costs for Defense Waste. The Department has paid amounts in excess of its estimated share of costs and as a result has no liability to NWF as of September 30, 2014 and 2013.

As of September 30, 2014, the Department's Defense Waste total cost share is estimated, based on the methodology published in the Federal Register in August 1987, to be \$2,444,669 and interest owed is estimated to amount to \$672,737. As of September 30, 2014 and 2013, \$632,566 and \$631,262, respectively, was included in intragovernmental deferred revenue representing the Department's Defense expenditures in excess of the Department's cost share to-date.

Accounts payable	109	236
Other liabilities	200	199
Non-Intragovernmental		
Accounts payable and other liabilities	674	414
Total liabilities covered by budgetary resources	<u>983</u>	<u>849</u>
Total Liabilities	<u>\$ 58,629,603</u>	<u>\$ 55,492,682</u>

(9) Commitments and Contingencies

Spent Nuclear Fuel Litigation

In accordance with the NWPA, the Department entered into contracts with more than 45 utilities (standard contracts) in which, in return for payment of fees into the NWF, the Department agreed to begin disposal of SNF by January 31, 1998. Because the Department has no facility available to receive SNF under the NWPA, it has been unable to begin disposal of the utilities' SNF as required by the contracts. Significant litigation claiming damages for partial breach of contract has ensued as a result of this delay.

To date, 33 suits have been settled involving utilities that collectively produce about 82 percent of the nuclear-generated electricity in the United States. Under the terms of the settlements, the Judgment Fund, 31 U.S.C. 1304, paid \$3.2 billion as of September 30, 2014 to the settling utilities for delay damages they have incurred through September 30, 2014. In addition, 31 cases have been resolved by final judgments. Eight of those cases resulted in an award of no damages by the trial court and the remaining 23 cases resulted in a total of \$1.3 billion in damages, which has been paid by the Judgment Fund as of September 30, 2014.

The Department's SNF litigation liability is updated to include the effects of final judgments and settlements as well as payments to date from the Judgment Fund. Additional payments under these settled and adjudicated cases may be made if the utilities incur additional costs before the Department permanently disposes of the SNF. The Department believes its assumptions and methodology provide a reasonable basis for the contingent liability estimate.

UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND

Notes to Financial Statements
September 30, 2014 and September 30, 2013

(Dollars in thousands unless otherwise noted)

(9) Commitments and Contingencies (continued)

Nineteen cases remain pending either in the Court of Federal Claims or in the Court of Appeals for the Federal Circuit. Liability is probable in these cases, and in many of these cases orders have already been entered establishing the Government's liability and the only outstanding issue to be litigated is the amount of damages to be awarded. The industry is reported to estimate that damages for all utilities with which the Department has contracts ultimately will be at least \$50 billion. The Department believes that the industry's estimate is highly inflated and that the disposition of the 66 cases that have either been settled or subject to a judgment in the trial court suggests that the Government's ultimate liability is likely to be significantly less than that estimate. Accordingly, based on these settlement estimates, the total liability estimate as of September 30, 2014 was \$27.1 billion. After deducting the amount paid as of September 30, 2014, under these settlements and as a result of final judgments, a total of \$4.5 billion, the remaining liability is estimated to be approximately \$22.6 billion. Under current law, any damages or settlements in this litigation will be paid out of the Judgment Fund. The Department's contingent liability estimate for SNF litigation is reported net of amounts paid to date from the Judgment Fund.

The Department previously reported several developments that made it difficult to reasonably predict the amount of the Government's likely liability. The courts have since resolved that jurisdiction for these cases is appropriate in the Court of Federal Claims and that the Government cannot assert the unavoidable delays defense, under which, if it were applicable, the Government would not be liable for any damages. Furthermore, in fiscal year 2009 the President and the Secretary announced that the repository at Yucca Mountain will not be opened and established a Blue Ribbon Commission in January 2010 to evaluate alternatives. The Commission submitted a final report in January 2012 with their recommendations for consideration by the Administration and Congress. The Administration issued the "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Waste" on January 11, 2013 (Strategy Document), which is primarily based on the Commission's recommendation, but no Congressional action has been taken to date. The key assumptions from the Strategy Document are that (1) spent nuclear fuel remains on all sites until 2021 at which time an interim storage facility will open and begin receiving spent nuclear fuel and (2) reactors will incur costs reimbursable by the Department until it fulfills its contractual obligations. Future determinations on how the Department will meet its obligations under the standard contracts could materially decrease or increase the SNF litigation liability.

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Notes to Financial Statements

(Dollars in thousands unless otherwise noted)

(10) Deferred Revenue

As described in Note 2, all fees, both kWh fees and Defense high-level radioactive waste fees, as well as the related interest and investment income, are recognized as revenue to the extent of expenses incurred. Amounts in excess of current expenses are deferred. Deferred revenue as of September 30, 2014 and 2013 was as follows:

	<u>FY 2014</u>	<u>FY 2013</u>
Intragovernmental		
Fees billed:		
One-time spent nuclear fuel fees:		
kWh fees	\$ 31,418	\$ 49,378
Defense high-level waste fees	3,216	4,625
Interest:		
Income on investments	1,411,273	1,365,047
Non-intragovernmental		
Fees billed:		
kWh fees	432,400	685,228
Interest:		
One-time spent nuclear fuel fees	1,164	1,991
Other revenue	-	324
Total revenues	<u>1,879,471</u>	<u>2,106,593</u>
Less earned revenue	<u>(11,955)</u>	<u>(9,709)</u>
Change in deferred revenue	1,867,516	2,096,884
Deferred revenue - beginning balance	<u>34,127,095</u>	<u>32,030,211</u>
Deferred revenue - ending balance	<u>\$ 35,994,611</u>	<u>\$ 34,127,095</u>

Total Net Position	\$ -	\$ (22,614,625)	\$ (22,614,625)	\$ -	\$ (21,342,157)	\$ (21,342,157)

The NWPA requires the owners and generators of nuclear waste to pay their share of disposal costs into the NWF and, to that end, established a fee for electricity generated and sold by civilian nuclear power reactors which the Department must collect and annually assess to determine its adequacy. A special fund within Treasury was created to account for the collection of those fees. Fees collected in excess of expenses incurred are invested in Treasury securities and any interest earned is available to pay expenditures related to radioactive waste disposal activities covered by the NWF.

(12) Explanation of Differences between the Statement of Budgetary Resources and the Budget of the United States Government

The NWF FY 2013 *Statement of Budgetary Resources* reconciled to the Budget of the United States by combining both of the budgets for Defense Nuclear Waste Disposal (89-X-0244) and Nuclear Waste Disposal (89-X-5227). The President's Budget containing actual FY 2014 balances is expected to be published and available on the OMB website (<http://www.whitehouse.gov/omb/budget>) in February 2015. Budgetary resources and obligations incurred are reconciled to the Departmental balances as published in the Appendix to the Budget; distributed offsetting receipts and net outlays are reconciled to the Departmental Balances in the Federal Program by Agency and Account section of the Analytical Perspectives Volume of the President's Budget.

(13) Reconciliation of Net Cost of Operations to Budget

The objective of this information is to provide an explanation of the differences between budgetary and financial (proprietary) accounting. This is accomplished by means of a reconciliation of budgetary obligations and non-budgetary resources available to the reporting entity with its net cost of operations.

	FY 2014	FY 2013
RESOURCES USED TO FINANCE ACTIVITIES:		
Budgetary Resources Obligated:		
Obligations Incurred	\$ 5,440	\$ 1,960
Less: Spending Authority from Offsetting Collections and Recoveries	<u>(5,001)</u>	<u>(1,907)</u>
Obligations, Net of Offsetting Collections and Recoveries	<u>439</u>	<u>53</u>
Offsetting Receipts:		
Fees for Disposal of Spent Nuclear Fuel	(639,536)	(733,753)
Earnings on Investments	<u>(1,437,908)</u>	<u>(1,436,839)</u>
Total Offsetting Receipts	<u>(2,077,444)</u>	<u>(2,170,592)</u>
Net Obligations	<u>(2,077,005)</u>	<u>(2,170,539)</u>
Other Resources:		
Imputed Financing from Costs Absorbed by Others	800,093	1,099,950
Other:		
Offsetting Receipts, Deferred	2,641,941	2,849,543
Adjustment for Department of Energy Appropriation	<u>(3,216)</u>	<u>(4,625)</u>
Total Other	<u>2,638,725</u>	<u>2,844,918</u>
Net Other Resources Used to Finance Activities	<u>3,438,818</u>	<u>3,944,868</u>
Total Resources Used to Finance Activities	<u>\$ 1,361,813</u>	<u>\$ 1,774,329</u>
RESOURCES USED TO FINANCE ITEMS NOT PART OF THE NET COST OF OPERATIONS:		
Change in Resources Obligated for Goods/Services/Benefits Ordered But Not Yet Provided	<u>\$ 5,052</u>	<u>\$ 7,175</u>
Total Resources Used to Finance Items Not Part of the Net Cost of Operations	<u>5,052</u>	<u>7,175</u>
Total Resources Used to Finance the Net Cost of Operations	<u>\$ 1,366,865</u>	<u>\$ 1,781,504</u>
NET COST ITEMS THAT DO NOT REQUIRE OR GENERATE RESOURCES IN CURRENT PERIOD:		
Increases in Unfunded Liability Estimates	\$ 1,272,242	\$ 1,630,450
Components Not Requiring or Generating Resources:		
Depreciation and Amortization	(564,428)	(729,719)
Revaluation of Assets and Liabilities	-	(323)
Other	<u>(5,334)</u>	<u>49,488</u>
Total Components Not Requiring or Generating Resources	<u>(569,762)</u>	<u>(680,554)</u>
Total Net Cost Items That Do Not Require or Generate Resources in Current Period	<u>702,480</u>	<u>949,896</u>
NET COST OF OPERATIONS	<u><u>\$ 2,069,345</u></u>	<u><u>\$ 2,731,400</u></u>

Required Supplementary Stewardship Information for Research and Development for the fiscal years
ending September 30, 2014 – (Unaudited – See Accompanying Auditors' Report)

(Dollars in thousands unless otherwise noted)

Expenses for research and development programs applicable to the Nuclear Waste Fund to conduct activities on the long-term storage of high-level nuclear waste at a permanent underground repository were as follows:

	Direct Cost	Depreciation & Other Managerial Cost	Total Cost
FY 2014 APPLIED			
Environmental Quality	\$ -	\$ -	\$ -
FY 2013 APPLIED			
Environmental Quality	\$ -	\$ -	\$ -
FY 2012 APPLIED			
Environmental Quality	\$ -	\$ -	\$ -
FY 2011 APPLIED			
Environmental Quality	\$ -	\$ -	\$ -
FY 2010 APPLIED			
Environmental Quality	\$ 189	\$ 63	\$ 252

NUCLEAR WASTE FUND**

Supplementary Information - Schedule I
Schedule of Cumulative Net First and Second Repository Costs for the
Thirty Two Years Ended September 30, 2014 – (Audited – See Accompanying Auditors' Report)

(Dollars in thousands unless otherwise noted)

First Repository Costs	<u>\$ 7,508,636</u>
All Other Program Costs:	
Program Support	2,177,957
Transfers of Appropriations	663,697
Waste Acceptance, Storage and Transportation	770,397
Imputed and Other Costs	<u>152,506</u>
Total All Other Program Costs	<u>3,764,557</u>
Second Repository Costs	<u>108,896</u>
Total First and Second Repository Costs and Other Program Costs	11,382,089
Less Earned Revenue	<u>(11,363,553)</u>
Cumulative Net First and Second Repository Costs	<u><u>\$ 18,536</u></u>

**UNITED STATES DEPARTMENT OF ENERGY
NUCLEAR WASTE FUND**

Supplementary Information - Schedule II
Schedule of Cumulative Revenues and Deferred Revenue as of and for the
Thirty Two Years Ended September 30, 2014 – (Audited – See Accompanying Auditors' Report)

(Dollars in thousands unless otherwise noted)

Intragovernmental:	
Fees billed:	
kWh fees	\$ 996,143
One-time spent nuclear fuel fees	174,598
Defense high-level waste fees	3,750,028
Interest:	
Income on investments	18,851,418
Non-intragovernmental:	
Fees billed:	
kWh fees:	18,308,083
One-time spent nuclear fuel fees	2,174,802
Interest:	
One-time spent nuclear fuel fees	2,395,640
Other revenue	<u>707,452</u>
Total revenues	47,358,164
Less earned revenue	<u>(11,363,553)</u>
Deferred revenue	<u><u>\$ 35,994,611</u></u>
