

Better Plants Program

The U.S. Department of Energy's (DOE's) Better Buildings, Better Plants Program is a voluntary partnership initiative to drive significant energy efficiency improvement across U.S. industry. 151 leading manufacturers are partnering with DOE through Better Plants to improve efficiency, slash carbon emissions, and cut energy costs.

Partner Benefits

Manufacturers in the Better Plants Program set energy saving goals, usually 25% over 10 years. They receive:

- ▶ **National Recognition** to highlight their leadership including a feature on the Department's website, annual recognition letters from DOE management, and invitations to special events. Partner success stories are also highlighted in DOE newsletters and other publications.
- ▶ **Technical Support** through a Technical Account Manager (TAM) who helps Partners develop energy management plans, identify energy-saving opportunities, and track energy performance metrics. TAMs also guide companies in the use of DOE's energy performance tools and connect companies to additional resources at the federal, state, or local level.
- ▶ **In-Plant Trainings**, which are unique, 3- to 4-day sessions, led by experts in industrial energy efficiency who train plant staff to establish energy management systems, conduct plant assessments, use DOE tools, and implement cost-effective projects. Better Plants Partners can apply to host or participate in these special training events.
- ▶ **Energy Saving Resources**, which are available to Better Plants Partners on a facilitated basis. These resources include free energy audits for qualifying facilities, energy analysis software tools, and peer-to-peer networking opportunities.
- ▶ **Additional Opportunities** are open to Better Plants Partners to deepen and expand their commitment to energy efficiency. For example, 21 companies (bolded on page 2) have stepped up to the Better Plants Challenge, a high-level leadership program for manufacturers demonstrating enhanced transparency around their energy performance data and best practices. Additionally, DOE is working with a select group of partners on separate initiatives targeting supply chain energy efficiency and water savings.

Better Plants Snapshot, February 2015

Accomplishment	Total
Number of Partner Companies	151
Approximate Number of Plants	2,300
Percent of U.S. Manufacturing Energy Footprint	11%
Reported Savings	
Cumulative Energy Savings (TBtu)	320
Cumulative Cost Savings (Million)	\$1,700
Cumulative Avoided CO ₂ Emissions (Million Metric Ton)	18.5
Average Annual Energy Intensity Improvement Rate through 2013	2.4%

How to Join the Program

Joining the Better Plants Program is easy. Contact the Better Plants team via e-mail at BetterPlants@ee.doe.gov to receive the voluntary commitment form. Return the form, signed by your CEO or senior executive. From there, DOE will organize a call with your company to kick off the partnership.

Better Plants Partners as of February, 2015

- **3M**
- **Alcoa**
- Amcor Rigid Plastics
- ArcelorMittal USA
