Subject: Docket No. 14-179-LNG
Date: Monday, February 09, 2015 3:12:30 PM

I am submitting comments pertaining to Docket No. 14-179-LNG, an application from Pieridae.

I request an extension of the comment period for this project. The time between the final application and this close of comments is inadequate.

I would also submit the following comments now.

This permit should be denied. It is NOT in the interest of the U.S. public. The only benefits will accrue to the company.

Not only will it cause harm to the local environment, increase the long-term use of fossil fuels thus frustrating our national interest in addressing climate change, but it will send natural gas overseas instead of using it for domestic purposes.

Ellen Z. Harrison
