Date: Monday, February 09, 2015 11:27:48 AM

I am writing in opposition to Pieridae Energy (USA) Ltd.; Application for Long-Term Authorization To Export Domestically Produced Natural Gas Through Canada to Non-Free Trade Agreement Countries After Liquefaction to Liquefied Natural Gas for a 20-Year Period.

The proposal is not in the public interest and the application should not be granted.

Given that methane has 86 times the global warming potential as CO₂e in a 20 year timeframe, the DOE should consider the full life-cycle of the gas to be exported from extraction through transportation, processing, liquefaction, and re-gasification.

Kathleen M. Padden
