Subject: Pieridae Energy Export proposal: FE Docket No. 14-179-LNG
Date: Monday, February 09, 2015 3:53:36 PM

I respectfully request that the DOE, Office of Fossil Energy extend the deadline for public comment in re. the "Application for Long-Term Authorization To Export Domestically Produced Natural Gas Through Canada to Non-Free Trade Agreement Countries After Liquefaction to Liquefied Natural Gas for a 20-Year."

Allowing the export of LNG through Canada to support and justify the construction of high-pressure, proposed pipelines through New England, eg, Kinder Morgan's NED pipeline, is not in the public interest, but in the interest of private, corporate profit.

Together, we must carefully assess the price to paid to the price to be paid by our citizens and to the environment that sustains us by allowing export of NG for private profit.

Marion E. Wheeler
